All **badgepoint®** name tags are characterized by their convenience and attractive design. The patented **smag®** magnetic system is now even better thanks to its new "twist-proof" and "easy-lift" properties. Guaranteed not to slip, it comes away from the counter-magnet easily, despite providing a powerful hold.

International versions of the **badgepoint®** main catalog are available for download on our websites:

-  Deutsch: www.badgepoint.de
-  Français: www.badgepoint.fr
-  Español: www.badgepoint.es

High-quality name badges

Development and production “Made in Germany” – from badgepoint®!

Professional name badges are a key component of any modern corporate identity. The detailed depiction of your corporate design on high-quality materials combined with a bespoke inscription help represent your company. Staff who reveal their name on a badge are not only signaling their sense of responsibility, they are also indicating that they are approachable at any time. badgepoint® specializes in the production and worldwide distribution of premium name badges, focusing solely on name tag systems – its core area of expertise. Here at badgepoint®, we’ve been shaping trends in the international name-badge industry for decades.

Because they are “Made in Germany” and subject to uncompromising quality controls, badgepoint® name badges are among the most popular products of their kind, readily used by renowned companies.

Our own, user-friendly product developments combined with imaginative designs: at badgepoint®, these are priority issues. The result is a whole host of patented solutions, such as the smag® magnetic system.

**Wolfgang Blindow**Managing Director
badgepoint® Name tag systems**Wolfgang Seeling**Head of Production
badgepoint® Name tag systems

Dear Customers,

Being honest, reliable and human – these qualities are extremely important to us in our dealings with our customers as well as internally within the **badgepoint®** group. Each of our products is characterized by high-quality materials, practicality and excellent design. As well as the flexibility of standard systems, other plus points include the option of self-inscription from your PC, custom solutions with outstanding results, fair prices and excellent service. These ever-present and convincing values have made **badgepoint®** a market leader in name tags. Our satisfied customers have helped us achieve this goal. After all, it's your good name we want to present in an outstanding way.

As a production location, Germany offers clear benefits: we can respond quickly and flexibly to customer requests; we only use very high-quality, certified materials and produce our badges in accordance with German and European environmental standards; we can assume direct control of our quality-assurance system locally; we have short information lines, from development through to production and the sales team and, therefore, to the customer.

We are very successful in what we do. We are profitable and are continuing to grow. Your satisfaction with **badgepoint®** products gives us fresh incentive. Every day!

"We make names visible"

Orders of 10 or series with more than 100,000.

The **badgepoint®** team lives and breathes name tags and will rise to any challenge.

Free inscription service!

badgepoint® offers a free "ready-for-use" inscription service for all initial orders and reorders of individual name tags. When placing your order, simply provide us with your list of names in Excel. You will then receive the ordered name tags with inscribed name cards ready-made (name printed on 1 line, Arial, centered, black)! This offer does not apply to **badgepoint®** standard name tags, "complete" and "aluline plus" name tags and offset pre-printed sheets.

Bonus for reorders!

When reordering from the standard range, **badgepoint®** guarantees the scale prices charged for the first order. This bonus does not apply to individual products from the **badgepoint®** Atelier.

Service guarantee!

badgepoint® name tags are extremely high-quality products "Made in Germany" with a long service life. That's why **badgepoint®** offers a **5-year supplier guarantee** on all product components. This guarantees long use, even beyond the end of production.

Badge types

The **badge types** shown here provide an initial impression of the **badgepoint®** product line. For more extensive information, please refer to the relevant pages. All of our products are listed there in detail together with all of the available sizes and fastenings. To order by fax, simply use one of our order templates. You can also order quickly online from our **badgepoint®** online shop. This is available on the internet at: www.badgepoint-shop.com

Product guide

We want to help you to find quickly the badge that suits your company. Our [product guide](#) helps you to do this quickly and easily. Select one of the three sections or choose an application area. The listing guides you to the page you want with information on the product you are interested in.

-  » I want to do **all of the printing for my badges on my PC**. Please ship them to me directly from the **badgepoint®** warehouse.
-  » I want **badgepoint® to print my logo on the badge** ahead of time but I'll print the names using my PC.
-  » I want **badgepoint® to print my logo on the badge**.
-  » badge for **ID cards or staff name tags**.

NEW: You can also run the **badgepoint®** labeling software online, with access to your account from any computer that has an Internet connection. Really handy when you need extra name cards at a trade fair, for example.

Attractive options

High-quality metallic surfaces, for example, make the **polar®** name tags from badgepoint® highly prestigious. Since the acrylic glass or aluminum panel is attached along the sides, the badge gives the impression of being "open" at the top and bottom. The striking name tag is available in a selection of different styles, from the standard badge with an acrylic glass panel for self-inscription on the PC to a ready-made, fully pre-printed metal badge.

polar® - elegant design, proven functionality and quality "Made in Germany". Often copied and never matched, the polar® name tag from badgepoint® is a leader in its field.

High Quality

All components that make up polar® name tags from badgepoint® are top quality, "Made in Germany". The badges clearly stand out from similar products by virtue of their design, practicality, the workmanship of the materials used and their durability. To round things off, we also offer a comprehensive name-tag service, including inscription, spares and accessories. If you have any questions about badgepoint® products, (before or after sales), our badgepoint® team will be happy to give you expert, one-to-one advice.

The new "gold" front panel turns polar® "alu-print" and "alu-complete" name tags into badges with much greater design possibilities. This style is popular in the hotel and catering sector. The digitally printed panel looks particularly charming with its gold-colored holder, but also goes well with black or anthracite.

A system to suit all requirements: The polar® name tag is available in various styles and for all types of lettering. From the standard name tag to self-inscription and a complete premade version for immediate use.

Screen or UV direct printing

The **polar®** name tag from **badgepoint®** can be printed via the screen print method or using UV direct-to-substrate printing. The table shown should help you choose the right print method to suit your requirements. Whatever method you chose, you can expect accurate, detailed results in customary **badgepoint®** quality!

polar® "quick-print"	polar® "plexi-print"
Advantages UV direct printing	Advantages UV of screen printing
+ lower initial costs	+ custom contour possible
+ shorter production times	+ reliability of color
+ also suitable for smaller orders	+ silver and gold print color possible
+ high-resolution halftone print 1200x900 dpi	+ print of full areas
+ 4-c print + white	
Disadvantages UV direct print	Disadvantages of screen print
- no custom contour	- higher initial costs
- no print of full areas right into the bleed	- longer production time
	- only suitable for larger quantities
	- limited halftone

polar® "quick-print" name tags benefit from direct UV digital printing. The motif is printed with precision behind the transparent panel and then cured to make it scratch-resistant. A printing process that is also suitable for smaller quantities.

Thanks to the new UV direct print method, there is now also the option of printing white on your polar® "alu-print" and polar® "alu-complete" name tags, offering new creative freedom and interesting results.

The new **polar® "color-print"** and **polar® "color-complete"** name tags are interesting new additions to the **polar®** series. The badges are printed using the UV direct-to-substrate digital print method, saving on initial costs. White is now newly available! An excellent solution if you want striking, colorful name tags.

The **polar® "plexi-print"** name tag print motif is advantageously printed behind the acrylic glass panel using the screen print method, the contour then being laser-cut. An uncompromising, high-end product for large orders!

Laser contour and lavish production using the screen print method make **polar® "plexi-print"** a top product in its class.

Perfect fastening solutions

It is really important to be able to fasten your name tag to your clothing properly. **badgepoint®** therefore recommends its **smag®** magnetic system, available in two strengths: "standard" (= blue) for normal or "extra" (= black) for tougher demands. This magnet is very flat in design, making it very easy to handle. The design and strong adhesive force of the magnet mean that both modules can be interlocked to become twist-proof, whilst the new shape enables easy separation (easy lift) of both modules. **polar®** from **badgepoint®** can also be provided with alternative fastenings.

- » **smag®** "standard" and "extra" magnetic system
- » pin, tie clip
- » rotated-combiclip (only **polar®** 30, 35)

*The patented **smag®** magnetic system recommended by **badgepoint®**, with its two magnet strengths of "standard" (=blue) and "extra" (=black) and countless fastening options, make **polar®** name tags extremely versatile.*

*95% of all **badgepoint®** customers use our **smag®** magnetic system.*

*With a color range of 3 metallic, 9 full-tone and 6 translucent surfaces plus the various different product alternatives, the **polar®** name tag offers lots of creative scope. For larger print-runs, special colors are also possible for **polar®** name tags.*

polar® "metal"

The new variation of polar® "color-print" with its colored front panels, is ideal for name tags with a striking imprint. Attractive combinations are also possible with metal holders. Precision details and the option of having white using UV direct-to-substrate digital printing means results on a par with high-quality screen print methods. A quick-to-produce, inexpensive top product from "badgepoint®", ideal for smaller order quantities.

polar® "alu-complete"

Product features

- » flat, slightly convex design keeps badge steady
- » front panel made of aluminum, anodized silver or gold
- » high resolution, direct-to-substrate UV digital printing, including white!
- » completely mounted, for immediately use
- » **polar® 20** (68 x 22 mm), front panel 64 x 22 mm
- » **polar® 30** (70 x 30 mm), front panel 65 x 30 mm
- » **polar® 35** (80 x 34 mm), front panel 74 x 34 mm
- » surface of holder metallized, gold-colored finish or plastic

» logo and name preprinted

» production time: 15 working days after customer approval

polar® "color-complete" from badgepoint® is a ready-made name tag for immediate use. The colored front panels are printed to high quality using a digital direct-to-substrate print method, before being cured for scratch resistance. Striking name tags can be combined with the plastic holders. Metal holders can also produce sophisticated, attractive results.

polar® "plexi-print"

Product features

Practical Design

Specially conceived for the service sector, the **office** model from **badgepoint®** is esthetically attractive while remaining astoundingly practical. By choosing from the many colored frames, you can perfectly adapt the badge to your company's corporate image or use different colors for different company departments. The well thought-out frame with rounded edges avoids the risk of injury in, say, hospitals and healthcare environments. The integrated **badgepoint®** magnets make the hard-wearing plastic badge a surprisingly affordable solution. Comes with following possible fastenings*:

- » **smag®** magnetic-system "standard" and "extra"
- » plastic pin, suspension clip (also metal-free), combi-clip, tie clip*

* depends on badge size

The "extra" **smag®** magnet is the ideal solution if you want to give the office name tag a secure hold. The plastic pin is a budget alternative.

badgepoint® office can also be used in combination with the handy suspension clip. For those areas where metals could have a disruptive influence, the name tag can be fitted with a metal-free suspension clip.

The
original

The introduction of the new format **office 20** represents an additional, discreet size for this practical name tag. Ideal if using professional clothing to project your corporate identity.

The transparent panel of the new **office "quick-print"** name badge from badgepoint® is digitally printed on the reverse, protecting the printed design from scratches and wear and tear.

Up to 18 different color variations allow the office name tag to blend in easily with an existing CI.

Individual printing

The introduction by badgepoint® of three new name tags in the **office** range represents a logical extension to this product family. The design elements of the new models are similar to those seen in the **office "classic"** name tag. However, they also offer the option of customized printing. **office "color-print"** and **office "alu-print"** have space on the front panel. In the case of **office "quick-print"**, by contrast, the transparent panel is digitally printed on the reverse. These esthetically appealing name badges are a high-quality, robust solution for use in environments where name cards are frequently swapped or where self-inscription is called for.

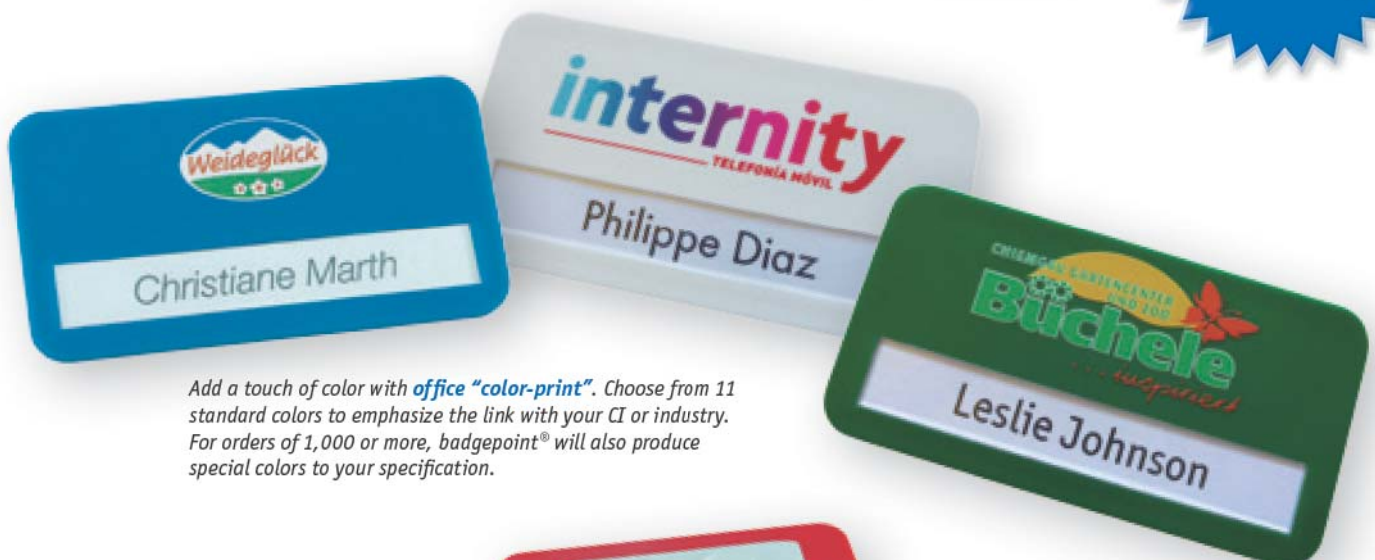

The **office "alu-print"** name badge has a frame made of plastic in a neutral color (anthracite). The front has been provided with a digitally printable front panel made of aluminum.

Your logo will look particularly stylish when applied to the anodized **office "alu-print"** front panels. At tradeshows or at presentations, the standard version of the patented system magnet is the perfect solution.

Name
flexible

Add a touch of color with office "color-print". Choose from 11 standard colors to emphasize the link with your CI or industry. For orders of 1,000 or more, badgepoint® will also produce special colors to your specification.

You can also obviously use the patented **smag®** magnet with office "color-print". For a secure, comfortable hold in sales and service environments, badgepoint® recommends the "extra" magnet.

Objects
and
furniture

With office "object" you can attach name tags to furniture, shelving, wash stations or other objects and workstations that are used by several people and where names often need to be changed.

New in 2012: following many requests from customers, badgepoint® has revamped the office "object" magnet. A self-adhesive magnet is attached as a basis. The office "object" name tag can be placed flexibly on top, offering a secure hold. This solution can be used wherever information on objects (such as items of furniture) has to be changed on a frequent basis.

round or angular logo element*

amigo®

New kind of name tag with a round or angular logo element

Innovative design

With their innovative design, the **amigo®** name tags from badgepoint® are unique in their field. In the **amigo® "doming"** badge series, a digital, offset or screen printing method is used to print the logo, before being finished with a three-dimensional transparent epoxy cover. A highly transparent acrylic glass profile protects the name card, which can be easily swapped.

amigo® "doming" is particularly suitable for large-series production and is a particularly good-value option. In the **amigo® "alu-print"** badge series, badgepoint® prints the logo on brilliant aluminum digitally (rounded or square-shaped, whichever suits your CI best). The name cards, which can be labeled using a PC, are protected by a high-quality acrylic glass profile and can be easily swapped. **amigo®** logo and profile holders are available in a selection of designs, making a host of different combinations possible.

amigo® "alu-print"

p. 35

amigo® "doming"

p. 36

amigo® is ideal for large or small series. And because it's value for money, it's always an attractive option.

Assembly of **amigo®** name tag: The name card holder is attached to the plastic basic holder. This part will be connected to the logo element. (**badgepoint®** delivers **amigo®** name tags pre-fitted!)

High
quality

Combinations

The **amigo®** series offers a diverse range of possible combinations. The 3 metallic and 2 plastic logo element surfaces, available in a round or square shape, with digitally printed aluminum or synthetic resin doming, can be combined with two name card holders of different colors.

With its metallic-colored logo element and cool, clean look, **amigo® "alu-print"** is particularly popular with firms and organizations in the healthcare sector.

amigo® "alu-print" name tags are precision-printed via the UV direct-to-substrate print method at high resolution. Color areas with negative elements are reproduced with top definition.

With its visually appealing 3D effect **amigo® "doming"** is particularly striking. The acrylic resin doming goes particularly well with our high-quality acrylic glass name-card holder.

amigo® "doming" is particularly well suited to applications in the hotel and catering trade, with its gold logo holder, shown here in the "square" and "circle" versions.

smag® magnetic system

For **amigo®** name tags badgepoint® recommends the patented and well-known **smag®** magnetic system in two strengths for normal ("standard") or extreme requirements ("extra"). The name tag can alternatively also be fitted with a pin or tie clip.

The amigo® "doming" logo element is very good at showing off your company logo and will impress your audience with its high-quality metal surfaces.

amigo® "alu-print"

Introducing new aluline-plus

Introducing **aluline-plus** – a brand-new addition to the badgepoint® aluline series for 2012. badgepoint® has partnered with Imprint Plus™, a Canadian company and innovator of the Reusable Name Badge System to provide you with a high-quality reusable name badge that can be created on the spot with just a PC and printer. Prior to this partnership, many customers wanted a metal name badge that could be reused and customized in-house, that still maintained professional, high-quality standards. True to the notion that two heads are better than one, badgepoint® and Imprint Plus have pooled their expertise together to develop a new product that offers the best of both worlds. For the new **aluline-plus** system, badgepoint® combines award-winning components from Imprint Plus with its own patented **smag**® magnet. The result is a beautifully engineered system with the indisputable badgepoint® quality our customers know and love.

» smag® – “standard” and “extra” magnetic system
» also available with pin or tie clip

aluline-plus is the ideal solution for convenient in-house customization: it is fast, flexible and offers money-saving value in the long run. Printable transparent inserts are placed between an aluminum name plate and crystal clear shatterproof lens cover to protect and project your image.

p. 48

plano

If you want to reflect your company's sophistication, the **plano** name tags from badgepoint® make an elegant impression. The timeless design of the clear name tags utilizes high-quality materials and high-precision manufacturing. This self-labeled name card unites simple functionality with a perfect design. Guaranteed to be the perfect badge when your goal is exclusivity. As well as the patented **smag**® magnetic system the badge can obviously also be fitted with other fastening solutions.

- » smag® "standard" and "extra" magnetic system
- » Pin, clip, rotated-combiclip, VARIO (pin + flaps)

The small **plano "quart"** format is ideal if you want to wear a name tag really discreetly, in the normal fashion. It is in fact the very discreet design of this badge that makes it a real eye-catcher.

"Beauty is in the eye of the beholder"
Sokrates

plano from badgepoint® is the result of high-quality workmanship: acrylic glass in its purest form in a timeless design.

profil

profil, the classic model from badgepoint® that has been tried and tested for years. The attractive curvature of the patent-protected glass-clear badge combines utmost style with practical handling. **profil** is completely functional and esthetically pleasing. After printing the labels on your PC, you simply insert them along the side. This ensures that the labels always remain fixed, even in difficult situations. The badge is guaranteed not to tilt and goes perfectly with all types of clothing. badgepoint® recommends its patented **smag**® magnetic system for fastening available in two strengths for normal or extreme demands – or as part of a set. **profil** can obviously also be provided with alternative fastenings.

- » smag® "standard" and "extra" magnetic system
- » pin, clip, combiclip

Attempts to copy **profil** have met with little success. The original remains unmatched in terms of quality and workmanship "Made in Germany".

The domed shape of **profil** allows a secure, close fit on clothing whilst protecting the inserted name card in its premium acrylic glass section.

skyline

The **skyline** badge from **badgepoint®** offers excellent visual possibilities. The **skyline "classic"** badge can be manufactured with a custom contour, distinguishing the badge from standard rival versions with its very individual design. The high-quality acrylic glass transparent panel is silk-screen back printed and precision laser-cut. The self-labeled name cards are simply inserted into the integrated holder and can be exchanged at any time.

The name tag comes complete with the **smag®** magnetic system or a brooch pin and can also be made without transparent panel as **skyline „promotion“** (logo badge only).

- » smag® "standard" and "extra" magnetic system
- » brooch pin ("promotion" with pin or rotated-combiclip)

High-quality acrylic glass and perfect imprint make **skyline "classic"** from badgepoint® a very robust and attractive name tag, even without a contour.

Get your logo into shape! With badgepoint® skyline, the sky's the limit: be it the upper edge or the bottom of the badge, you are free to design your own custom contour all the way round.

With skyline the name card is held securely in place by a shaft on the patented magnet and can be flexibly changed over at any time.

The combination of high-quality acrylic glass, silk-screen back printing and a perfect laser cut makes **skyline** an especially attractive name tag.

High
quality

skyline "classic" from badgepoint® with custom contour and insert for self-inscribed name cards, or skyline "promotion", for pure logo print – two attractive and durable solutions.

High-quality acrylic glass and perfect imprint make skyline "classic" from badgepoint® a very robust and attractive name tag, even without a contour.

p. 54

event

event from badgepoint® is particularly suitable for participants at events, conventions, congresses and the like.

By utilizing the innovative folding technique (DBGM - German federal utility patent), event is a low-weight three-dimensional badge that is extremely easy to handle. You simply insert the self-labeled name cards and attach them by closing the badge holder. The name tag is very affordable and attractive.

- » smag® "standard" and "extra" magnetic system
- » pin, rotated-combiclip

With its somewhat different design and innovative folding technique, **event** from badgepoint® is unmistakable. A modern name tag for events where your name needs to be displayed prominently.

It is easy to assemble event. Insert name cards into the holder and fix by snapping shut. You can even swap cards when the badge is closed.

event is now also available with the patented anti-rotation smag® magnetic system. For heavy fabrics (e.g. outdoor) or tough demands, we recommend smag® "extra" (=black).

public

The inexpensive **public** badge from badgepoint® is an outstanding candidate for short-term applications, for example assistants, trainees or students. The combiclip or the variable magnet attachment makes public suitable for almost all types of applications or events. The self-labeled badge fastens the name card firmly and securely. The high-quality hard plastic covering ensures stability and legibility.

- » smag® "standard" and "extra" magnetic system
- » pin, combiclip, rotated-combiclip

forum 60 "lanyard" is a popular, casual way of wearing a name tag at a trade fair or event.

forum

At large events such as congresses and conferences the use of plastic sleeves as name tags has been established as the simple standard solution. The **forum** name tag from badgepoint® with its universal clip attachment or its clothing-independent strap solution is a tried and tested solution that satisfies all event professionals.

public 40 and public 60 both tried-and-tested formats, are now joined by the new **public 30** format.

forum "ID card" is a proven solution for company security passes and ID cards. As well as a universal clip fastening, badgepoint® also offers a handy yoyo or lanyard in highly striking standard colors.

World first in ID technology

id caddy "card-fix"

p. 58

id caddy "card-flex"

p. 58

id caddy "card-box"

p. 58

caddy "card-fix"

Whenever ID cards are worn as a loose pass, they also function as a name badge. With the **caddy**, an ID pass can now be attached to clothing without problem - like all badgepoint® name tags with the patented **smag**® magnet fastening. The simplest solution is the **caddy „card-fix“** where the patented and twist-proof **smag**® magnet is simply stuck to the ID card – and your name tag is ready.

*The choice of the "standard" magnet or "extra" magnet makes it possible to use **caddy "card-fix"** on almost all items of clothing*

*By using **caddy "card-fix"** the ID pass can simply be worn loose without "ugly card holders"*

***caddy "card-flex"** was developed specially for passes that have added functions, where the ID pass has to be removed with ease*

caddy

Contactless opening, closure or payment solutions using RFID technology – thanks to **caddy “card-flex”**, this is now possible in all manner of applications.

caddy “card-flex”

With the **caddy “card-flex”**, badgepoint® has launched a world first in ID technology. The really neat thing about the **caddy “card-flex”** is the fact that the ID pass can be removed from the caddy to double up as a door opener, for example. With the **caddy** a self-adhesive snap-on chip is simply stuck onto the ID pass. The base of the **caddy “card-flex”** is attached to clothing like a badgepoint® name tag with the **smag**® magnet. Now the ID pass can be secured to clothing with ease by means of the snap-on chip, and can be removed once more at will.

caddy “card-box”

If the ID pass has to be worn inside a protective sleeve, **caddy** can be used in the “card-box” model. A highly transparent protective sleeve can be secured to clothing like a name tag using the **smag**® magnetic system. The ID pass can be pushed in or out with ease via a slot at the back.

Thanks to its simple, timeless design – in the form of a see-through sleeve – **caddy “card-box”** will look good with any clothing without any problem

With **caddy “card-box”** the ID card can simply be pushed out of its sleeve via a slot on the back. A detent ensures it sits securely in the box.

caddy “card-flex” is completely new and opens up all manner of new applications for ID cards and passes.

caddy

Product features

- » an ID pass can now be attached to clothing with the patented smag® magnet system with ease.
- » **caddy "card-fix"** – the simplest solution where the patented, twist-proof smag® magnet is simply stuck to the ID pass, and your name tag is ready.
- » **caddy "card-flex"** – the ID card can easily be removed from the caddy to double up as a door opener, for example.
- » **caddy "card-box"** – if the ID pass is to be worn inside a protective sleeve, "card-box" can be used. A highly transparent protective sleeve can be attached to clothing like a name tag with the smag® magnetic system.
- » various tests with leading ID-card manufacturers have shown that most ID cards with RFID or data chips are unaffected (if in doubt, please conduct your own test for your specific application or ask the manufacturer of the ID cards!)
- » be careful with "old" ID cards with magnetic strips! Avoid using them because the static magnetic field of the caddy could affect the data content.

Desk plates

Made completely out of highly transparent acrylic glass

pult

Ensure improved communication through easy-to-read names and provide notes and information at the scene. The modular **pult** system name plate from badgepoint® is mainly used at conferences and the like as an attractive table name plate. However this name plate is also ideal for display on a front reception desk or for exclusive product information at presentations and trade fairs, or for awards ceremonies.

The **pult** table name plate is ideal for front-desk environments.

 pult

p. 62

 table

p. 62

pult is a discrete name plate for small committee meetings

The pult "uno" table name plate can be set up at two angles 30°/ 60°. The "duo" version is suitable for inscription on both sides.

Made in Germany

table

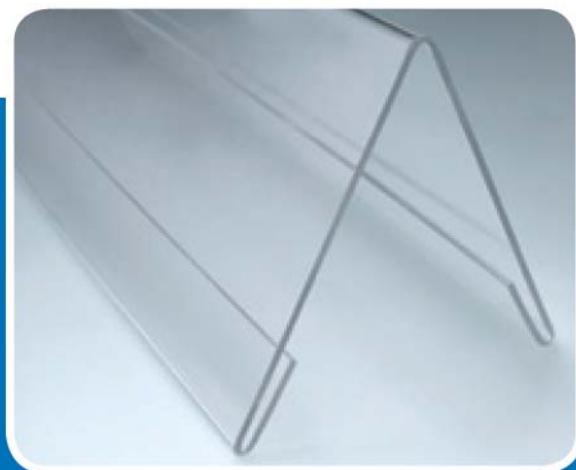

When personally addressing delegates at conferences this solution promotes communication during table discussions and on the podium. **table** from badgepoint® is a practical solution for these applications. The sturdy acrylic-glass panel is also ideal for product presentations, as an information sign on a tradeshow stand and for many other tasks.

The **table** name plate is ideal for visualizing offers and is made of high-quality acrylic glass "Made in Germany".

For **table**, badgepoint® also offers pre-folded sheets made of 160g card for a perfect finish!

pult

Product features

Yoyo		Metal/plastic	forum			 free sit	With clip for easy mounting on a belt loop

smag® – “magnetic system”

The **smag®** magnetic system was developed by badgepoint® engineers in cooperation with various customers and specialists. It is specially conceived for use as name tags. By carefully listening to our customers' requests, we have been able to develop a patented magnetic system that has been used in more than 10 million badges to a high degree of satisfaction. **smag®** is available with various accessories for a wide range of applications.

*The new version of the **smag®** magnetic system is in all versions a high-tech product “Made in Germany”. The new features enable even more convenient handling of the magnetic system and are characterized by even higher badgepoint® quality.*

*All **smag®** magnets are now even more user-friendly in their new form. The “easylift” function makes it easier to lift off the strong magnet.*

Product features

- » **smag® "standard"** (= blue):
high adhesion (suitable for all textiles)
- » **smag® "extra"** (= black):
extreme adhesion (for heavy textiles)
- » additional functions:
 "twist-proof" (also for "extra" version)
 "easy-lift" (new shape with projection for easier lifting)
- » kind to clothes (will not pierce)
- » twist-proof because of new type of shape (badgepoint® patent)
- » skin-friendly because of synthetic case
- » low radiation ("standard" and "extra")
- » available as single unit or in a set
- » direct from the manufacturer and patentee
- » modules for retrofitting of name tags available
- » all components as spares available
- » smag® magnetic systems are made in Germany

All magnetic systems are also available in the "self-adhesive" version with tape for retrofitting existing name tags (p. 70)

The German Federal Office for Radiation Protection (BfS) has responded to the frequently asked question: Are magnetic clips for name badges harmless?

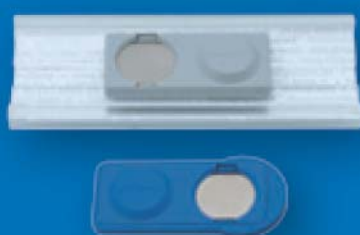

Carrying small permanent magnets near the body, for instance as magnet clips for name tags, is generally harmless. These applications represent a very locally limited exposure to weak static magnetic fields. When such magnet clips are used normally, the known biological thresholds are in no way reached. However, interference to some heart pacemakers by small magnetic fields cannot be ruled out. From around 1 mT magnetic flux density, interference to, say, magnetic cards, credit cards and watches is also conceivable. We do not, therefore, recommend that name tags be worn right over implanted heart pacemakers nor that sensitive magnetic cards be kept in jacket pockets.

Source: www.bfs.de/elektro/nff/andere_anwendungen.html (in German)
Version: 3.3.2010

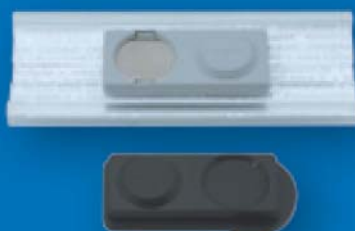

Safety tip

badgepoint® recommends that all carriers of pacemakers use pins or clips instead of magnets. Credit cards, IDs and magnet strips should not be kept in the vicinity of magnets.

smag® standard (=blue) for normal textiles.

smag® extra (=black). This magnet is suitable for heavy textiles or extreme daily use, e.g. day-to-day use in the service sector.

smag® is also available as a set. Both versions for different applications.

Performance of smag® magnetic system

		Color	Synthetic case	"twist proof" (badgepoint® patent)	"easy lift"	Adhesion	Adhesion normal textiles	Adhesion heavy textiles	Weight
smag® "standard"		blue	yes	yes	yes	2000 g	1000 g	500 g	6 g
smag® "extra"		anthracite	yes	yes	yes	3000 g	2000 g	1000 g	10 g

badgepoint® **box**

Accessories

Various boxes and cases are available to protect your high-quality badgepoint® name tags. The Single-Box, which also holds up to 10 additional business cards, means you'll always be well equipped for any business meeting. Our **Multi-Boxes** and cases allow you to pack complete series in a clearly laid-out manner, e.g. for use at trade fairs.

The blue badgepoint® **Single-Box** comes complete with a handy insert card. This means your name plate is always well centered.

badgepoint® **Single-Box**
(also for business cards)

badgepoint® name tags with aluminum front plates such as **polar®** "alu-complete" or "color-complete" are ideal for labeling with dymo labels. Order additional front panels without names imprinted, to give yourself flexibility - for instance at trade fairs - enabling you to respond quickly to staff changes on the ground. Many solutions like these are available from dealers.

Flag stickers

The self-adhesive flag stickers from badgepoint® are available in countless designs and can be fixed directly onto most badgepoint® name tags. Let people know your language skills or indicate to them your home country and make it easy for the people you meet to make initial contact with you. The flags provided with striking doming are a useful addition offering even more value to your name tags.

Product features

- » 10 or 25 flags on card
- » flag format: 10 x 7 mm
- » about 1.5 mm high
- » available ex works in numerous national flags
- » more nationalities on request

Flag stickers from badgepoint® can also be put together on your own premises. Allowing you to respond flexibly to requirements.

Software

For quick and easy labeling of your name tags badgepoint® has developed software called **“creator”**. At the heart of this software lie easy handling and practical nametag functions. Five years of experience and customer requests have been integrated into the new version. By creating it as a Java-Applet, the solution is platform-independent and available free of charge on the internet at www.badgeserver.com.

The self-labeling of name cards on the computer is a highly flexible and affordable solution.. The name lists recorded in the badgepoint® creator 1.0 are simply printed out on perforated printing sheets. They can be easily separated into individual name cards and then inserted into the name tags, allowing you to respond quickly at any time to changing needs.

For orders of at least 500 name tags badgepoint® will deliver a full version of creator 1.0 free of charge!

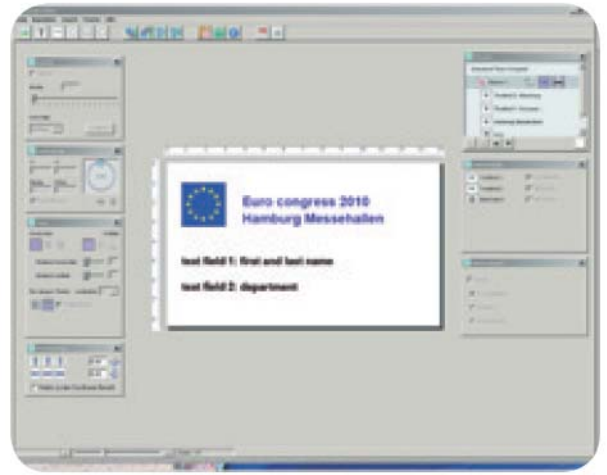

Product features of creator 1.0

- » WIN 95 / WIN 98 / NT / WIN 2000 / XP / Vista / Windows 7
- » multi-lingual CD (German/English/French/Spanish)
- » free of charge in the web at www.badgeserver.com
- » easily operated by experienced users
- » layouts /graphics/names are linked or input as in a standard letter.
- » powerful layout editor using multi-layer technology
- » expanded import of graphic formats
- » import external tables (CSV, text, XML, Excel)
- » convenient sorting functions and filters
- » self-explanatory program navigation
- » integrated online help
- » printout as PDF
- » expanded functions for printing
- » integrated clipart (e.g. flags)
- » Java Runtime 5 included on CD
- » free demo version available for download

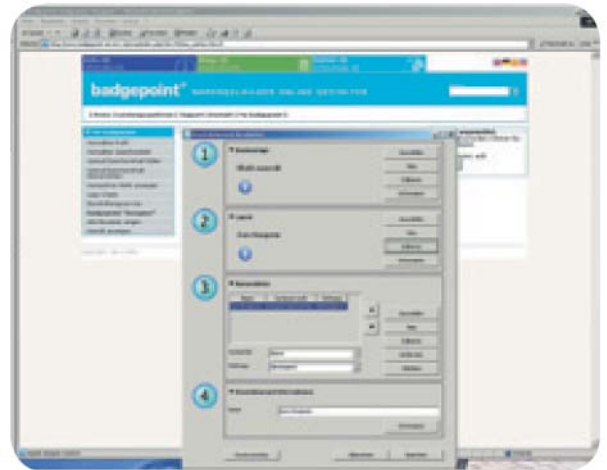

Demo

www.badgeserver.com – Online layout and inscription

The new labeling software, **creator 1.0**, is now available online via the new badgepoint® server. This allows you to use the Internet anywhere in the world to create your own personal name tag layouts and to write, access, edit and print out name lists. **badgeserver** makes it possible, for instance, for you to make your own name tag in line with the CI for a new sales person at a foreign trade show. You can also use the platform to prepare orders of individual name tags or printing sheets that are processed further by badgepoint®. This saves costs and time compared with conventional inscription services. The new service from badgepoint® is free of charge to all basic users of all badgepoint® formats.

Additionally you can book the Business-User package for other applications such as business cards, labeling, other formats or extended memory capacity too.

The new service from badgepoint® is free to all badgepoint® customers and includes all badgepoint® formats. (www.badgeserver.com)!

TIP:

- » For simple inscriptions, for printing a name only once or twice a year, we recommend the use of Word templates. You can download these from our website at www.badgepoint.com
- » Professional inscription of name tags for events, conferences and the like can be best achieved with the powerful **creator** (multilingual).

Inscription service

The badgepoint® inscription service has many additional services to offer such as name-list compilation, labeling of series or the assembly according to your requirements, giving you name tags for immediate use without having to take care of the labeling yourself.

For the "atelier" inscription service, simply send your logo and the name lists to badgepoint, we'll take care of the rest for you. We will send you a design for approval. All you have to do is proofread it. This solution also includes personal advice from our experienced graphic designers.

*The badgepoint® „atelier“ team will be delighted to assist you in designing and labeling name tags if you prefer not to create nametags yourself using tags yourself using the new **creator 1.0** labeling software, for instance online on www.badgeserver.com*

“Atelier” inscription service

- » logo transfer, layout design (once only)
- » name compiling and proof print
- » name transfer from file and proof print
- » printing of name cards, monochrome (black)*
- » printing of name cards, full color
- » assembly (inserting the name cards in the name tags)*
- » flags (flags printed onto name card to display language skills.
for selection see p. 72)
- » graphic editing (logo design, logo editing, scan and repro service)
- » additional layout proposal (after 2 free revisions)
- » extra expense for sorting (if different from submitted file)
- » author or order changes (calculated according to cost)
- » using a custom font
- » urgency surcharge

** free of charge at service “Ready for use” (name printed on 1 line, Arial centered, black)*

Service “Ready for use”

badgepoint® offers a free “Ready-for-use” inscription service for all initial orders and reorders of individual name tags. When placing your order, simply provide us with your list of names in Excel. You will then receive the ordered name tags with inscribed name cards ready-made (name printed on 1 line, Arial centered, black). This offer does not apply to badgepoint® standard name tags, “aluline-plus” name tags, “complete” name tags and customized printing sheets.

Pre-print

badgepoint® can provide you with customized printing sheets containing, for example, your company logo printed using offset printing. You only need to print the names using your PC and you'll have colorful perfectly printed names cards in a matter of minutes. This solution is particularly appropriate for large numbers of cards.

With badgepoint® creator for example, you can print all of the names from a list onto the sheet using a laser or inkjet printer. The fine perforations make it easy to separate the name cards before you insert them into the holders.

Offset printing sheets

pre-printed the way you want it

 - for 2500 name tags (format 85 x 54 mm)

Data formats

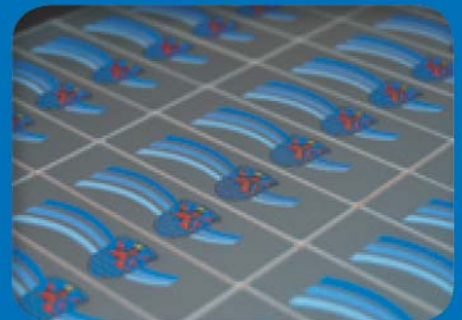

When it comes to providing data, to make business with badgepoint® as easy as possible for you, please take note of the following:

- » please supply data as far as possible in the form of a vectorized EPS, making sure you always convert fonts into paths.
- » colors must be in full-tone mode (PANTONE or HKS) or in CMYK mode (in case of 4-color print).
- » where possible provide data in open format so that we can make any corrections, if necessary.
- » In the case of image formats such as JPEG or TIFF note the minimum resolution of 300 dpi! (please liaise with the badgepoint® "atelier" beforehand!)
- » **warning!** A note about white in the digital print method: For white as a separate logo color, or when placing white underneath the logo, we need color-separated data, ideally as a vectorized EPS.

- » preprinted forms as order pads (please request one if you need one)
- » once we've received your order, we'll work out your reorder bonus

Reorder bonus

badgepoint® rewards loyalty!

When reordering from the standard range, badgepoint® guarantees the scale prices charged for the first order (does not apply to individual products from the badgepoint® atelier!).

Also in the shop from 2012!

When you place orders in the online shop, your reorder bonus is automatically calculated. It also takes into account your "offline" orders of recent years. Why not give it a try!

Example			
Initial order 250 name tags at 250 scale price			
250	POL35MA66	3.25 €	812.50 €
Reorder 100 tags			
Without bonus at list price 100 scale			
100	POL35MA66	3.95 €	395.00 €
With reorder bonus at 250 scale price			
100	POL35MA66	3.25 €	325.00 €
Reorder bonus = saving		0.70 €	70.00 €

Prices in example based on badgepoint® 2012 price list dated 01.01.2012

Delivery

badgepoint® delivers all orders via UPS. This is a reliable method that has been tried and tested for years. Of course, the discount we receive from UPS is passed on to you! This ensures that shipping costs remain low!

For orders worth € 250 and above we deliver free of charge within Germany (€ 500 and above for orders within the European Union).

Look out for our special campaigns when ordering in our online shop.

Delivery conditions

Type of delivery	Germany	EU	outside Europe	USA
UPS Standard	For orders made before 12.00 *) Delivery within 2-3 working days to centers of commerce 7.50 € (from 250 € free of charge)	For orders made before 12.00 *) Delivery within 2-3 working days to centers of commerce 30% discount based on UPS price list (from 500 € free of charge) ****)	For orders made before 12.00 *) Economical delivery Optimum transit time ***) 30% discount based on UPS price list

Please check exact transit time at www.ups.com 30% discount based on UPS price list	For orders made before 12.00 *) Fast economical delivery. Please check exact transit time at www.ups.com 60% discount based on UPS price list
UPS Express*	For orders made before 12.00 *) Delivery by next working day before 10.30**) 30% discount based on UPS price list	For orders made before 12.00 *) Delivery by next working day before 12.00 to centers of commerce 30% discount based on UPS price list	For orders made before 12.00 *) Delivery on the second working day to centers of commerce ***) 30% discount based on UPS price list	For orders made before 12.00 *) Delivery on the second working day to centers of commerce ***) 60% discount based on UPS price list
UPS Express Plus *)	For orders made before 12.00 *) Delivery by next working day before 8.30 **)	For orders made before 12.00 *) Delivery by next working day before 9.00 to centers of commerce		

*) Outside Germany, not available to all countries!

Calculate shipping costs as follows:

Your shipping costs = UPS Price - badgepoint® discount

You can determine the valid UPS shipping costs
online at www.ups.com

*) = assuming sufficient quantity in store (please inquire at badgepoint®)

**) = to almost all addresses (check at www.ups.com)

***) = exact transit time depends on customs duty office (check at www.ups.com)

****) = applies to mainland Europe only

NEW! Track orders online at: www.ups.com (you'll receive a package tracking number from badgepoint® or in the online shop)

If you want, we can also ship using your UPS account or a carrier of your choice (please enquire)

For very small orders, we reserve the right to add a surcharge for packing and processing.

For processing returns for which we are not to blame we charge a flat-rate fee of 15.- €.
