GUIDE

2 0 0 7

Alt i beklædning, fodtøj, rengøringsartikler og sikkerhedsudstyr,
samt reklamegaver og strøartikler med tryk, broderi og gravering, efter opgave.
Skilte, bannere og bilreklamer efter tilbud.

Our Company

Mission Mirtec was founded based on forty years of experience and know-how in the field to bring creative innovations to the signage industry. The company's mission is to introduce exciting new design and manageability concepts to the world of wayfinding.

Innovation Signs are for conveying information, but why stop there? They are decorative & functional. Mirtec takes signage one step further to create wayfinding systems that are informative, stylish, versatile, and multipurpose.

Quality Mirtec's number one concern is to deliver the highest quality products available. The company is ISO 9002 certified and all of the components used are made from top of the line materials.

Sign profiles are available in heavy duty, aluminum 6063 with natural anodized finish. The signs are covered with anti-reflective plastic transparent covers.

Customer Service

Mirtec believes that making customers happy is the key to good business practices. The company's totally modern production line is designed for rapid turnover and quick delivery. A How-To video and CD are available to take the guesswork out of using our products. Our commitment to customer satisfaction, based on attention to detail in every phase of product development, is found in the fine finish, variety of options, and convenience in installing and maintaining your Mirtec signs.

Did You Know?
That When You Select
Products From Mirtec's
Jupiter Series You also...

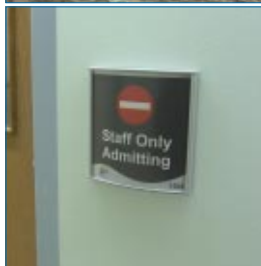

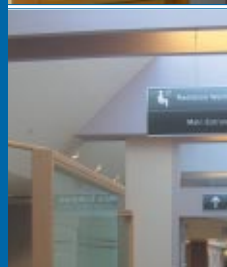

Become More Creative!

The exclusive and modern design of mirtec's products allows you to plan projects with a fresh outlook. The artistic variations of the products are endless and that will enable you to obtain amazing design results. At the Expo-2002 Orlando exhibition our stand was visited by large numbers of designers who expressed considerable interest in our products. A designer connected to N.A.S.A expressed especial interest in our products and commented "They are futuristic, They are great, They are complete".

Discover Your Printer

Once you have purchased a MIRTEC modular system, all you need do is add your own graphic design, print on your printer and insert in your MIRTEC panoramic modular sign. You can also refer to MIRTEC'S internet site for pictograms that are in international use.

Time Is Money!

When you wish to change The graphics in your Mirtec modular system all you need to do is to print your new message on your printer and replace the old printed paper. There is no need for a new installation. You don't have to approach any sign makers. Your MIRTEC modular sign is flexible just for your needs. It is that simple! Remember, time is money.

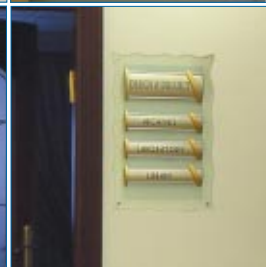

No Need For Maintenance!

Our products are manufactured from anodize aluminum to stringent high standards and do not require any painting. Our panoramic signs are ready for easy installation and immediate use and are designed to last for years.

You Don't Have To Compromise!

Our considerable range of possibilities and sizes allows you maximum flexibility in arriving at your ultimate choice.

Mix and Match to Create Customized Designs

Mirtec's patent pending mix and match system is a true breakthrough concept in the industry. This new line of interchangeable decorative elements, enabling unlimited design creativity, was developed with the architect and interior designer in mind. Pick and choose from an assortment of colors, shapes, and forms to create customized motifs for interior signs that provide direction, safety, and guidance.

Sign profiles are made from high quality aluminum 6063 with an anodized or oven cured coating. Aluminum or ABS plastic connectors are designed for easy removal.

The decorative elements, made from aluminum, are specially treated to create a luxurious look. Each part is gently stone polished in a process that requires several hours and then anodized guaranteeing an exceptionally high quality finish.

Use one panel as a wall plaque or attach two panels back-to-back to create two sided projecting and ceiling mounted signs. Signs are mounted on walls by a unique hidden mounting system or adhesive strips.

Interior signs accept regular paper printed with text and graphics for simple, user friendly management.

Sign fronts can also be engraved, laminated, silk screened, imprinted with Braille, or photometal finished.

A nonreflective acrylic cover is easily removed to allow changes as needed.

Mix & Match to Create Customized Design

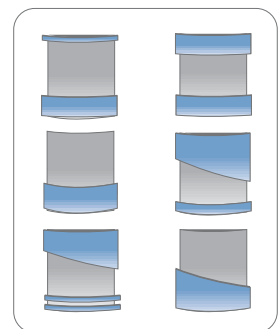

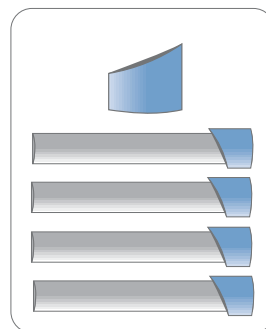

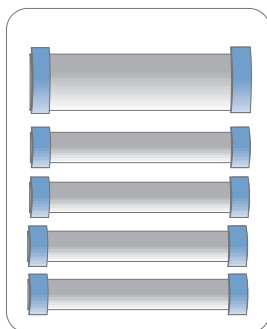

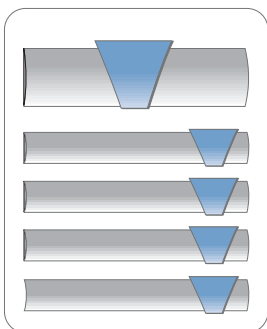

Mirtec's patent pending *Mix & Match* system is a true breakthrough concept in the industry. This new line of interchangeable decorative elements, enables unlimited design creativity.

Pick and choose from an assortment of colors, shapes, and forms to create customized motifs for interior signs that provide direction, safety, and guidance.

The decorative elements are made from aluminum with an anodized finish.

Decorative combination elements for indoor systems in a wide range of designs & colors.

Aluminum Connector

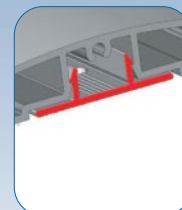

The Tic-Tac Aluminum system allows for large visual installations. This system allows for the profile to be attached with the use of aluminum connectors behind the sign without the need to deface the sign, thereby allowing clipping directly to the profile. It is possible to use plastic or aluminum side caps. The profile which is made from aluminum 6063 and the aluminum connectors guarantee top quality and durable materials.

Assembly:
Double-sided adhesive

Assembly:
Front penetration screw

Assembly:
Hidden aluminum connector with screw

Panel Extrusion

NEW!
2007

Mir 0624
220mm / 8.66 inch

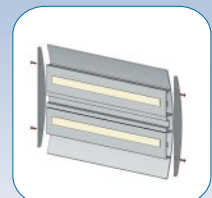

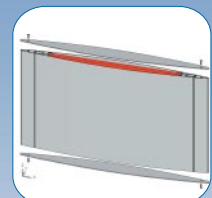

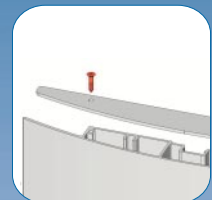

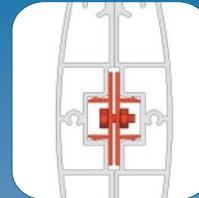

Mir 0623
146mm / 5.51 inch

Mir 0622
116mm / 4.56 inch

Length 2050mm / 80.7inch

Mirtec's policy of supporting architects, designers and sign professionals was one of the strongest factors in introducing the new panel extrusions.

After receiving enquiries regarding the availability of a non-insert sign face,

Mirtec's team of conceptual designers and technicians created this modular, interchangeable non-insert panel extrusion. The new extrusions are an excellent solution for facade application in areas which do not require updates.

Sign fronts can be engraved, laminated, laser printed, a photo-metal finish applied etc.

Jupiter panel extrusions are provided with caps which encase the open sides and

undetectable aluminium facade connectors to form an elegant and vandal safe way-finding solution

IMPORTANT!

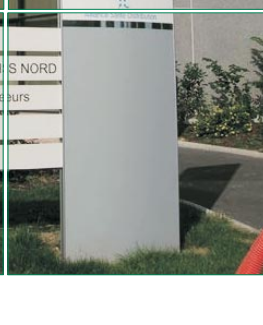

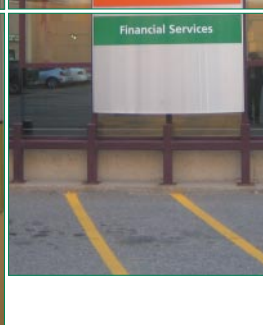

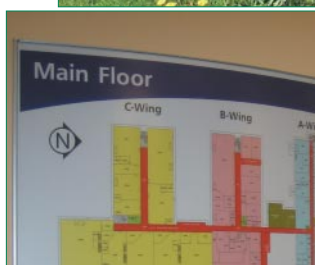

MIRTEC products have been researched, designed and developed from long experience with working with architects and designers in the modular sign industry.

The modular system that has evolved is easy to install and maintain and this produces considerable added value to the already aesthetic product.

The finished product has been ingeniously engineered to provide for a modular system that requires no welding or painting.

All the parts in the system are positioned and connected with screws.

The product has a smooth finish and is gentle to the touch.

Versatile Indoor/Outdoor Sign Solutions

Mirtec's line of versatile indoor/outdoor signs are distinguished by their sleek, slim edged design. These finely crafted signs add style and prestige to any surroundings. Flexibility is the guiding principle of Mirtec's Orion line.

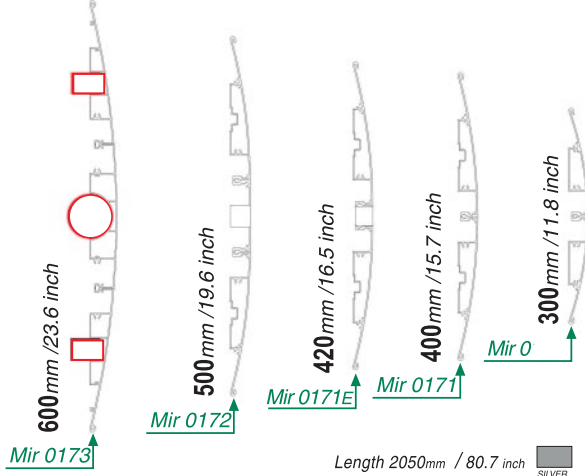

An almost unlimited range of dimensions is available to answer any requirement, including very large sizes.

These signs are constructed from aluminum 6063 and anodized or powder coated. The sign plate is available in aluminum, stainless steel or PVC.

One directional or two directional signs can be mounted on walls or projecting, hanging, and freestanding. Several base options are available allowing the designer to create an attractive wayfinding system for any environment.

Architectural Sign Systems

We Speak Sign Language

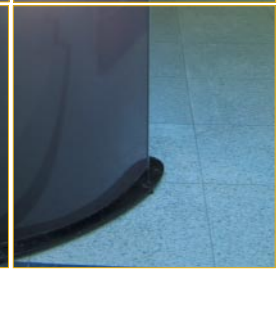

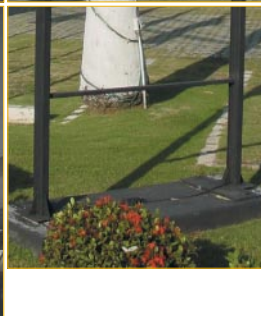

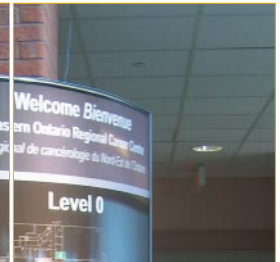

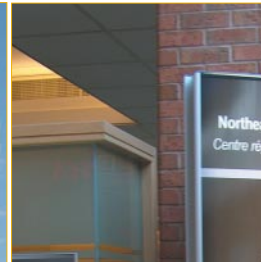

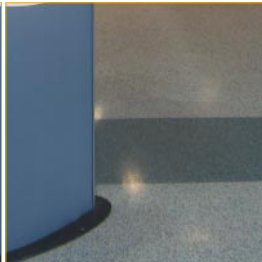

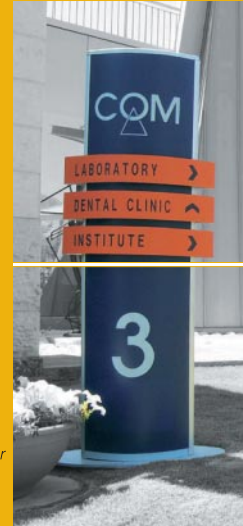

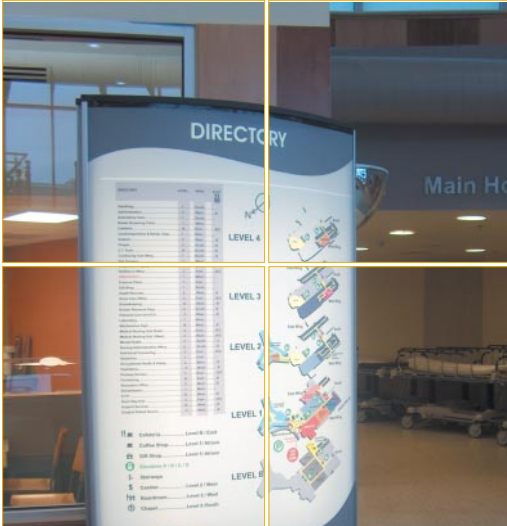

Are You Interested In Preserving THE OZONE LAYER?

The arched panoramic construction of the Mercury system is interesting beyond its aesthetic appearance and has additional illuminated signs.

The physical characteristics of the acrylic covering provides a tough surface, when the material is curved and with a thinner acrylic it is possible to produce the same illuminated sign.

The curved construction of the sign allows the illumination to reflect off the acrylic at a convenient angle and in this way reduces the wings of the illumination by up to 30%.

The result of a thinner acrylic with fewer illuminated wings provides for up to 30% savings in electricity.

Form Meets Function in These Indoor/Outdoor Signs

Mirtec's line of indoor/outdoor utility signs features an attractive curved body with a stylish narrow border that reflects modern day architectural principles. This utility line is designed to enable any freestanding sign to be converted into a multi-use information and display center for reception areas, stores, trade shows, or other uses. A special front panel grid can be attached to hang small items.

Accessories available include trays and holders for brochures, pamphlets & flyers. The modular design enables constructing one or two-sided illuminated signs or combining three panels to create a three-way display center. A unique edge allows incorporating separate text and decorative elements for a completely customizable solution to any customer's wayfinding needs.

The signs are constructed from aluminum 6063 and anodized or powder coated.

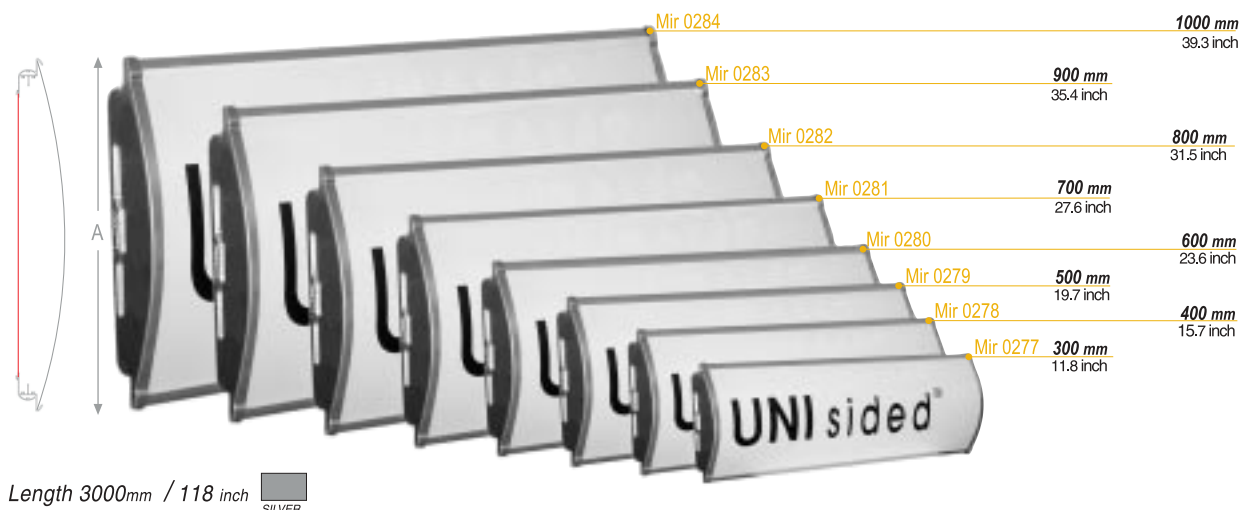

Sign plates are available in Perspex, aluminum, stainless steel, or PVC.

Choose from two styles of plastic or aluminum covers – smooth or raised edge.

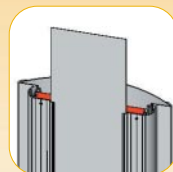

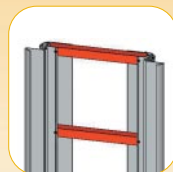

An optional internal lighting system is available for illuminated signs or combined with emergency lighting in strategic areas.

Signs can be one or double sided and attached directly to walls, hung from ceilings, or freestanding. A selection of ground level and elevated steel bases is available.

The diagram illustrates a lens-shaped component with two key dimensions labeled: 'A' for the vertical height and 'Z' for the horizontal width at the top. The lens is depicted with a gray fill and a black outline, showing a smooth, curved profile. Dimension lines with arrows indicate the measurement points for A and Z.

Architectural Sign Systems

We Speak Sign Language

MIRTEC'S Products Interface With ...

Offices, Public Buildings

A large variety of options and sizes are available that blend and match their surroundings and there is a system just for you!

Product Signs

It is possible to interface with internal illumination so that the products almost seem real.

Directional Signs For Different

Floor Levels

These signs are often your customers first contact with the business and reflect the "Corporate image". The system is harmonious with the internal signs and it is possible to interface with considerable graphic images.

Emergency Lighting Signs

Security and safety signs can operate like an emergency lantern during times of electricity failure.

Outdoor Directional Signs

various stands are available for supporting signs in outdoor locations such as industry, public institutions and parks.

Parking Areas

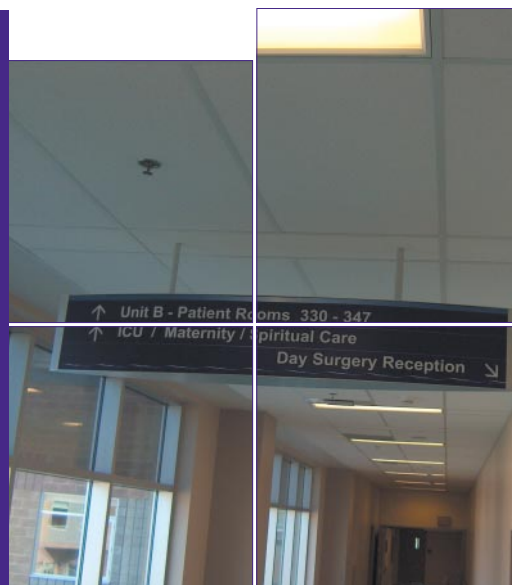

MIRTEC products maintain their aesthetic appearance even when utilised for the restricted spaces of parking lots.

Advertising Signs

With two levels of acrylic, one opaque and one transparent it is possible to change the advertisement without the need for applying adhesive.

Neon Protection

There are almost no hidden surfaces in the sign system and therefore with the protection provided by transparent perspex one will avoid coming into direct contact with electricity in the event of damages caused by breakage or inclement weather.

Uranus

Wayfinding in Style

Stylish, Sturdy Illuminated Indoor/Outdoor Signs

Mirtec's line of highly durable indoor/outdoor signs features an attractive curved body with a wide edge that enhances readability. The Uranus line is designed to integrate completely with Mirtec's other sign systems. All aluminum 6063 construction imparts a luxurious look to any building or complex. These versatile signs are available in an almost unlimited range of dimensions to answer every signage need.

The sign front is available in Perspex, aluminum, stainless steel or PVC.

The signs are faced with acrylic or UV resistant coating.

A water protected, low maintenance, optional internal lighting unit for illuminated signs ensures 24-hour peace of mind. Both one and double sided signs are available.

The signs can be attached directly to walls, hung from ceilings, or freestanding.

Uranus Slim

DIMENSIONS				
	A		Z	
	MM	INCH	MM	INCH
600	23.6	43	1.7	
800	31.4	53	2.1	
1000	39.3	63	2.5	
1200	47.2	75	3	

The **New Uranus Slim** Profile was engineered to provide a solution for suspended signs where the mounting surface is unable to support heavier systems.

A highly durable range of elegant and low maintenance interior/exterior signs.

The gently arching curve and the sleek contour of the side profiles make a bold architectural statement for primary entrance ID signs, Parking Directionals, Malls, Shopping Centers, Commercial Buildings, Healthcare facilities, etc.

Uranus Senior and Junior are compatible with the easy installation of both LED and Neon illuminating components.

- An almost unlimited range of sizes.
 - The versatile and highly durable extrusions Uranus Senior and Junior create illuminated and non-illuminated single sided wall plaques and directionals, as well as double sided freestanding and suspended signage.
 - As a perfect complement to all Mirtec Systems, the integration of Uranus signs into a way-finding project allows for a complete coverage of all orientation aspects.
 - The combination of illuminated signs using an opaque sign face and internal illumination with non-illuminated signs are the perfect way-finding solution in such public areas as Malls, Museums, Healthcare facilities etc.
 - Sign plates are available in polycarbonate (opaque), aluminum or stainless steel.
 - Standard profiles in silver anodizes are available.
- The option of RAL Powder coating is available on request.

Psychology Of Colors

Light Colors: create an illusion of size and spaciousness, provide light and clarity to space and contribute a perception of cleanliness.

Dark Colors: reduce, diminish the amount of light and sometimes even darken spaces.

The Power of Colors: pastel varieties and pale colors are calming.intens, powerful colors are stimulating.

 **RED:** warm, dynamic, stimulates, increases appetite, signals love and things from the heart. Profound red is aristocratic.

 **YELLOW:** warm, happy, young, dynamic and full of vitality. Bright Yellow connects with sunlight and inspires a warm, glowing atmosphere (not recommended for bedrooms).

 **GREEN:** calming, pastoral, designated as a cold color, indicates nature and vegetation, pleasant to the eye. Light Green indicates Spring and youth, but certain shades of Green connect to poison and jealousy.

 **BLUE:** cold and calming. Connects to the various shades of the sky and ocean. Intense Blue indicates potential and the lighter shades indicate spontaneity and youth. Dark Blue shades communicate Royalty and Nobility.

 **PURPLE:** transmits sophistication, almost doesn't exist in nature and therefore is regarded as artificial. Transmits an association with Royalty and is appropriate for elegant and prestigious places.

Color Combination:

White & Black Grey & Black create an elegant and cold atmosphere. A combination of a number of dark colors creates a gloomy, somber and heavy atmosphere.

Warm colors such as Red, Yellow, Brown and Orange create an inviting atmosphere.

 **BROWN:** warm, rich and varied. Indicates culture and prestige due to the connection to wood and leather. Certain shades can indicate sadness (falling of leaves).

 **WHITE:** pure, virginal, clear. Indicates cleanliness, simplicity and clarity. Contributes to a sense of spaciousness and size. However it sometimes creates an appearance of sterility, commonplace and boredom.

 **BLACK:** elegant, conservative. Automatically associated with night and also death. The use of Black on large surfaces will decrease the space and create an effect of darkness, but will produce a dramatic atmosphere for those seeking this effect.

 **GREY:** neutral, pleasant to the eye provided that the shade is not too dark. Contributes to concentration and does not disturb the eyes. For example, it is advisable to choose a grey office desk, even though Grey might not be in fashion.

“...Keeping Thing in Perspective.”

Now, *THIS* is really fascinating - it's rather dazzling to see it presented this way.

I certainly thought this was enlightening. beyond our sun ...
It's a big universe.

Antares is the 15th brightest star in the sky.
It is more than 1000 light years away.

Now how big are
you?
And how big are the
things that upset
you day to day?
Or for that matter,
the things that are
important?

Keep life in prospective

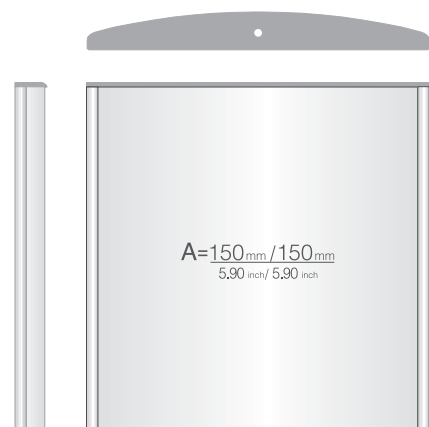

A	Main Building Directories Wall Frame, Information Displays, Pylons, Post Signs, Policy Signs.	5

Function & Purpose

The printed Guide is designed for client demonstration purposes. For the creation of specification for individual projects. It should be used in conjunction with the software provided; either on CD Rom, or directly through our international website using a private access code.

The Software affords the user the ability to create technically exact specifications by moving the technical drawings of the actual signs desired to the specific page and adding the details in the space provided. To receive your Software, kindly contact the registered Mirtec Dealer in your area or contact Mirtec Directly:
www.imirtec.com

Architectural Sign Systems

We Speak Sign Language

"Everything should be made as simple as possible, but not one bit simpler"
- Albert Einstein

"Imagination is the beginning of creation. You imagine what you desire, you will what you imagine and at last you create what you will"
- George Bernard Shaw

"In order to be irreplaceable, one must always be different"
- Coco Chanel

"Art is the proper task of life"
- Friedrich Nietzsche

"To be properly expressed a thing must proceed from within, moved by its form"
- Meister Eckhart
