WORKWEAR

HARD-WORKING CRAFTSMEN DESERVE THE BEST. SO WE NEVER SETTLE FOR LESS THAN THE ULTI-

BEEN PIONEERING THE DEVELOPMENT OF CUTTING-EDGE WORK WEAR BASED ON THE REAL NEEDS

MAKE YOUR PROFESSIONAL LIFE EASIER, SAFER AND MORE PRODUCTIVE. AND WE KNOW WHAT IT

MATE IN ON-THE-JOB SAFETY, PROTECTION AND FUNCTIONALITY. FOR MORE THAN 30 YEARS NOW WE'VE

OF SKILLED CRAFTSMEN WHO HAVE TO BE ABLE TO RELY ON THEIR GEAR. WE FIGHT EVERY DAY TO

TAKES TO GET THE JOB DONE.

FIGHTING FOR BETTER WORKWEAR

WELCOME TO THE FOREFRONT

Looking for the ultimate workwear? Flip through this catalogue and you've found it. Because we strive every day to push the boundaries, constantly trying to redefine the very concept of modern workwear. Not developing the most advanced workwear just for the sake of it, but because we know what you're facing every day at work. We know our garments can make a difference that really matters to you. Not only today but also in the long run, so you can look forward to a long and healthy career. On the bottom line, we believe it's your right to stay ahead. Just try any garment in our new 2012 range and you'll feel it right away. We never compromise. Ever.

TESTED

Cutting-edge work wear requires cutting-edge testing. And nothing beats reality. Of course we work closely with the best test laboratories and institutes in Europe to ensure that our garments meet your expectations. But for us, the ultimate tests are carried out by our Test Crew – demanding and hard-working professionals who really put our prototype garments and new designs to the test, evaluating everything from functionality, comfort and protection to quality and durability. They do it the only way that counts: at work, sometimes for months and in every type of climate and weather. Ranging from the arctic winters in northern Scandinavia to the heat of southern Europe. And they never settle for a compromise. If the design needs to change they say so. We adjust the garment and they try again, until every detail is in place. Only then is it a true Snickers Workwear garment – that truly works for real.

Henry Lundberg | Manager Product Management Workwear

The Snickers Workwear test crew is our ultimate source of inspiration. They challenge us every day. Which is why we are constantly pushing the creative and technological limits in the development of cutting-edge work wear.

FOR REAL

A revolutionary design, but will it really perform the way we expect, in every possible on-the-job situation? Our test reports are the ultimate source for honest answers. Filled in by hard-working craftsmen who really put our new prototypes to the test, giving us first-hand feedback on what works and what doesn't. Allowing us to adjust and fine-tune the design until it truly performs just the way we expect. For real.

Authentic Test Protocol from a carpenter in Norway who tested early prototypes of the XTR Shield jacket and trousers.

Test protocol

Name: _____ Date: 12/3-10 Profession: CARPENTER
Tested product: 3310 Company: STØRMEEN BYGG & HANT.
Size: 52 Test period: 1-2 mnd

(Mark in the boxes, 5 = Best)

How do you rank the product overall? 5 4 3 2 1
Comment: REALLY

How do you rank the design? 5 4 3 2 1
Comment: SPRTY

How does the product fit you? 5 4 3 2 1
Comment: TO 1

How does the functions in the product work out? 5 4 3 2 1
Comment: GOOD USE

Specific good functions? 5 4 3 2 1
Comment: THE BEST JACKET I HAVE HAD. Good fit
LOOK GOOD

Specific bad functions? 5 4 3 2 1
Comment: THE MATERIAL IN THE FRONT POCKETS ARE TOO STIFF
AND TOO BIG

What did you use before and how does the product compare to what you used previously? 5 4 3 2 1
Comment: LIGHT MATERIAL, ELASTIC FABRIC. Good body fit
RIPPER IN FRONT LEFT MANICED? IS THIS RIGHT?
MISS VELCRO IN SLEAVES, TAKE AWAY THE THUMB GRIP. NO MORE
USE BETTER FIT, AND LIGHTER

What work have you done wearing the product? 5 4 3 2 1
Comment: CONCRETE, CONSTRUCTION.

Describe your working environment you used the product in and how long time you used it per day? 5 4 3 2 1
Comment: Indoore 8 hours a day

How many times did you wash the garment? How do you rate the quality? 5 4 3 2 1
Comment: 3-4 TIMES. Holding up good

Suggestions and wishes for improvement of the product? 5 4 3 2 1
Comment: TAKE THE STRONG MATERIAL AND MOVE IT TO SHOULDERS
AND FOREARMS.

Comment: Good waist adjustment, but oversized fit.

Solution: Adjusted design and fit. Waist adjustment no longer needed.

Comment: Fabric too stiff in front pockets.

Solution: Jacket reinforced with a lighter Super Fabric® than used on the trousers.

Comment: Maybe add a Velcro feature to tighten sleeves and remove the thumb grip.

Solution: Deleted thumb grip. Elastic inside cuffs to keep cool air out.

Comment: Double front pockets are not functional.

Solution: New designed with large zipped pockets.

THE SNICKERS WORKWEAR ACTIVE CLIMATE SYSTEM

One thing is for sure: you can't change the weather. However, the weather itself changes from one season to the next, and sometimes even from one hour to the next. This puts extreme demands on your workwear. You need to be able to adapt to the constantly changing conditions. That's exactly what you get with the Snickers Workwear Active Climate System.

All our garments are designed to work together. This means our first, second and third layer garments are optimised to perform perfectly with each other. Allowing you to easily adjust to the climate, while at the same time retaining the optimum combination of on-the-job comfort, functionality and protection, in any kind of weather.

Ultimately it's quite simple: with the Snickers Workwear Active Climate System you'll be prepared whatever awaits you outdoors. Allowing you to turn a demanding climate into extreme working comfort. All year round.

WORKS ALL YEAR ROUND – FOR YOU

COLD, WET, HOT, WINDY?

Working outdoors is special. No matter if it's freezing cold or boiling hot, or if wind and heavy rain are trying to bring you to a standstill, the challenge is to stay comfortable and properly protected while at the same time having easy access to your tools. With the Snickers Workwear Active Climate System you know you can. The wide range of advanced garments for different seasons is designed to turn the weather issue into a non-issue – allowing you to fully concentrate on your job and always perform your best.

DRESS RIGHT

Dressing right is easy if you're well-prepared. Just make sure you have the right garments to choose from when the climate changes. And make sure the garments you use together form a complete system. Then follow these basic dressing rules during your working day:

- Always adjust your clothing to the environment
- Adjust your clothes to your level of activity
- Dress in layers that work together
- Ensure moisture transportation and ventilation
- Increase insulation temporarily when you rest

STAY WARM

FIRST LAYER FOR MOISTURE TRANSPORT.

Forget cotton – it absorbs and retains water. Our underwear in soft and comfortable wicking polyester keeps your body warm and dry.

SECOND LAYER FOR INSULATION.

These garments are designed to insulate by creating a pocket of air around your body – keeping you warm. Choose from our advanced range of micro fleece, fleece, pile and quilt.

THIRD LAYER FOR WEATHER PROTECTION.

Here you need reliable wind and water protection. Your garment should be waterproof, breathable, strong and durable. Like our new advanced A.P.S. garments.

IN THE COLD

To dress warm when it's cold is easy. But to dress right requires more attention. Because when the going gets tough you start sweating. But later, when the pace slows, the moisture your body has created cools and you start to shiver. What you need is advanced ventilation and the ability to control and regulate the heat from your body. That's exactly what you get if you dress in 3-layers from Snickers Workwear – ensuring outstanding functionality and working comfort.

CLIMATE COMFORT.

With advanced ventilation you can adjust the temperature for optimal comfort. The front zipper is one way, ventilation zippers under the arms is another and so too is being able to adjust the bottom of jackets and trousers. Remember: a lot of body heat escapes through the head – so use a hat or hood.

THINK SAFE.

Staying warm in the cold is crucial for safety at work. When you are cold your ability to react is hampered, you become less effective and risk making bad decisions. The human organism can adapt to tropical conditions, but it can't acclimatise to cold weather. The solution is to always protect your body with appropriate clothing – like the Snickers Workwear cold weather garments.

9085 Striped Beanie, reversible, page 116
9517 Winter glove, water proof, page 114

STAY DRY IN

Staying dry and comfortable in the rain is all about choosing the right type of rainwear for the job. The choice depends on how intensely you're working and how long you work in the rain without taking a break. When hard at work, the fabric's breathability is crucial for ventilating your body heat. The longer your working shifts, the tougher the demands on waterproof technology used in the garment.

1888 XTR GORE-TEX® Shell Jacket, page 51
9518 Craftsmen Glove, page 114

3378 A.P.S. Craftsmen's Waterproof Trousers, page 52

9038 Rain Jacket PU, page 53
9037 Rain Trousers PU, page 53

GORE-TEX®

For 100 % dry working
comfort during long working
shifts in the rain, choose
our GORE-TEX® garments.

THE RAIN

A.P.S.

For reliable waterproof protection during shorter shifts in the rain, choose our A.P.S. garments.

PU

For quick and reliable protection during intense rain or less active jobs, choose our PU garments.

CHEAT TH

When the wind starts to blow you'd better watch out. Because even if it's a dry and clear day, the wind makes the temperature plummet quite drastically. However, if you choose the right type of windproof workwear you'll stay warm and comfortable. Just as with rainwear, the choice depends on how intensely you're working and how long you stay outdoors. When hard at work, the fabric's breathability is crucial for ventilating your body heat. The longer your work shift, the tougher the demands on the windproof technology used in the garment.

PROTECTIVE FLEECE

For reliable windproof protection during less active jobs, the Snickers Workwear Protective Fleece is ideal.

SOFTSHELL

For windproof protection during shorter working shifts, a Snickers Workwear Soft Shell jacket is the perfect choice.

E WIND

TURN DOW

When the going gets really hot and humid, ventilation is the key. Snickers Workwear hot weather garments feature advanced designs and intelligent materials for extreme working comfort, ventilation and functionality. Original Pirate Trousers with maximum ventilation and amazing work shorts with all the pockets you need are just two examples.

HIGH-TECH FABRICS.

Our high-tech A.V.S. fabric features an innovative blend of polyester and bamboo carbon. The bamboo is ground down to nano-size, one millionth of a millimetre, and blended with the polyester fibre. The result is a highly breathable material, giving you exceptional moisture transport, UV protection and anti-odour comfort.

UV-protection

Our UV-protected garments have a UPF (Ultraviolet Protection Factor) of 40+ or 50+ to help protect your skin from the sun.

Coolmax®

Soft fabric designed to transport moisture away from your body helping you to stay cool and dry.

XTR – THE ULTIMATE WORK TROUSERS.

For extreme performance at work, wear our pioneering XTR Craftsmen Holster Pocket trousers in Canvas+. Count on advanced no-compromise design, Cordura® 1000 reinforcements for excellent durability, superior knee protection, patented knife fastener and limitless built-in functionality.

OPTIMAL FREEDOM OF MOVEMENT.

Our work trousers feature an advanced cut with Twisted Leg™ design and Snickers Gusset™ in the crotch for outstanding working comfort and freedom of movement.

UNLIMITED FUNCTIONALITY.

Velcro tool fasteners, front pockets, holster pockets, leg cargo pocket with mobile phone compartment and ruler pocket with an outside compartment ensure that you have everything you need within easy reach.

LONG, PIRATE OR SHORT?

The advanced Snickers Workwear 3-series design is available throughout our entire range of work trousers, pirate trousers and shorts. Giving you loads of built-in functionality, all year round.

CERTIFIED KNEE PROTECTION.

Working on your knees takes its toll. That's why our work trousers and kneepads with the patented KneeGuard™ positioning system give you the most advanced, certified knee protection available. So you can protect yourself today – and save your knees for tomorrow. Read more about our range of cutting-edge kneepads on page 35.

HARDWEARING DOUBLE SEAMS

Most Snickers Workwear trousers feature double lockstitch seams, which is much stronger than the often-used triple chain stitch seams. The 2-needle topstitching features 2 upper and under threads, giving an extremely strong and durable seam that can't rip. The 3-needle chain stitch seam, on the other hand, only uses 3 upper-threads and no under-thread - resulting in a weaker seam that can easily rip.

The patented knife fastener on our XTR Craftsmen's Canvas+ Trousers keeps your knife securely in place at all times.

XTR – THE ULTIMA

3244 XTR Craftsmen Holster Pocket Trousers, Canvas+

For extreme performance at work. Cutting-edge work trousers with the ultimate no-compromise design. Features advanced ergonomic cut, Cordura® 1000 reinforcements for outstanding durability, superior knee protection and limitless functionality.

SAVE YOUR KNEES

WITH ADVANCED, CERTIFIED KNEE PROTECTION

Efficient kneepads that stay firmly in position are crucial for reliable knee protection. That is exactly what you get with the patented Snickers Workwear KneeGuard™ positioning system. The unique kneepad pocket design on all our trousers features special seams, allowing you to adjust our specially designed kneepads in different positions to ensure superior knee protection.

With our new range of cutting-edge kneepads you can count on superior EN 14404-certified knee protection. For example, our advanced 9110 kneepads feature a hard-wearing outside and softer inside, combining efficient pressure distribution and protection against penetrations with maximum comfort. The unique design also makes the kneepads extremely flexible when you walk, yet they close around your knees when you kneel down. In addition they feature high sides that prevent your knees from sliding off the kneepads.

So if you want to look after your knees – wear Snickers Workwear trousers and you can rely on patented KneeGuard™ protection that follows your every move.

EN 14404 Knee Protection Standard. This standard encompasses the size, force distribution, penetration resistance and user testing of kneepads.

Type 2, Level 1

Reliable knee protection for craftsmen with a mobile working environment that involves regular kneeling to perform their job. Designed to protect the knees from pebbles, nails and other small objects up to 1 cm on hard and flat surfaces.

Type 2, Level 0

Effective knee protection for craftsmen who occasionally need to work on their knees indoors. Designed to protect the knees on flat surfaces.

Snickers Workwear kneepads are designated and certified for use with the Snickers Workwear trousers' knee pockets, according to EN 14404:2010. The kneepads are not certified for other branded trousers.

FOR SUPERIOR PROTECTION – WEAR 9110 KNEEPADS

9110 Craftsmen Kneepads

Save your knees with the latest in EN 14404 certified knee protection (Type 2, Level 1). Extremely efficient and comfortable kneepads ready for the patented Snickers Workwear KneeGuard™ positioning system.

- Hard wearing durable outside and softer inside for maximum comfort, force distribution and cut protection
- Advanced design makes it extremely flexible when walking, yet closes around the knee when bending down
- Can be placed at different heights in the knee pocket to ensure correct position for maximum protection
- Always in place – high sides prevent the knee from sliding off the kneepad
- Fits in the knee pockets on all Snicker Workwear trousers

Material: 100% Polyethylene.

Size: One size.

9111 Service Kneepads

Reliable, certified knee protection for indoor work on even surfaces. Comfortable, flexible and ready for Snickers KneeGuard™ positioning system. EN 14404 (Type 2, Level 0).

- Reliable and certified protection for painters, service technicians and when you occasionally need to work on your knees indoors
- Light and soft for optimum working comfort
- Flexible when walking, yet closes around the knees when you bend down
- Can be placed at different heights in the knee pocket to ensure correct position for maximum protection
- Always in place – high sides prevent the knee from sliding off the kneepad

Material: 100% Polyethylene.

Size: One size.

9118 Floorlayer Kneepads

The floorlayer's certified knee protection. Kneepads that maintain their shape, hold their position – and won't slide around when you're hard at work. EN 14404 (Type 2, Level 1).

- Made up of polyethylene beads that make the kneepad light and breathable
- Best suited for Snickers floor layers trousers 3223. Kneepads that keep their shape during hard work over a long period of time
- Designed not to slide so that they remain in position when moving about on your knees

Material: 100% Polyethylene.

Size: One size.

XTR – THE ULTIMATE WORK JACKET.

RAINY AND NOISY?

The roll-in protective hood in super-light GORE-TEX® fabric with its advanced adjustment system can be worn over earmuffs for extra warmth in demanding working environments.

WARMTH WITH VENTILATION.

The advanced body-mapped lining combines warmth with ventilation for unbeatable working comfort. Mesh lining at the back and in the armpits for optimum ventilation. Cosy quilt lining in the front for essential warmth around vital organs such as the heart and lungs.

STAY DRY.

Count on outstanding dry working comfort in our advanced 2-layer GORE-TEX® jacket with sealed seams. It's 100% waterproof, windproof and offers outstanding breathability for hours on end.

CONTROL THE TEMPERATURE.

Convenient climate regulation at the waist allows you to adjust the temperature. Close to stay warm, open to increase ventilation.

STAY DRY

Staying dry and comfortable in the rain is all about choosing the right type of work wear for the job. With the Snickers Workwear Active Climate System you can choose between three different types of rainwear.

For long rainy days, the cutting-edge performance of our 100% waterproof, windproof and highly breathable GORE-TEX® garments is the obvious choice. If you mainly work shorter shifts in rainy weather, our new advanced all-weather garments in A.P.S. fabric will keep you covered. And for less active jobs, when ventilation is not as crucial, our PU garments are ideal.

For 100% dry working comfort during long working shifts in the rain, choose our GORE-TEX® garments.

For reliable waterproof protection during shorter shifts in the rain, choose our A.P.S. garments.

For quick and reliable protection during intense rain or stationary jobs, choose our PU garments.

EN 343 PROTECTION AGAINST FOUL WEATHER

This standard encompasses materials and stitching and is divided into two sections: water penetration and resistance to water vapour.

For water penetration there are 3 classes, where Class 2 requires W_p (water pressure) ≥ 8000 Pa and Class 3 requires $W_p \geq 13000$ Pa. Class 1 requires the same as Class 2, but without pre-treatment.

For resistance against water vapour, that is to say RET, (the lower the rating the greater the penetration) there are 3 classes:

Class 1: $RET \geq 40$

Class 2: $20 < RET \leq 40$

Class 3: $RET \leq 20$

Water penetration is noted at the top in the symbol and resistance to water vapour is at the bottom in the symbol.

FOUL WEATHER

XTR GORE-TEX®

TAKING WORK JACKETS TO THE EXTREME

For extreme performance, try our advanced XTR GORE-TEX® Shell Jacket. Allowing you to fight back the elements and stay dry, warm and ventilated with amazing working comfort, all day long. Count on superior weather protection combined with outstanding functionality and durability. Forget all you know about advanced GORE-TEX® sportswear, because GORE-TEX® work wear has to withstand far more demanding tests. Harder water pressure, tougher laundry cycles and not least much tougher requirements when it comes to functional design, waterproof seams and long-lasting durability. Like our XTR GORE-TEX® Jacket – guaranteed to keep you at the forefront.

Integrated 3-way adjustable protective hood.

Large front pockets with water-proof zippers.

Audio pocket with mobile compartment – accessible without having to open the main zip.

Pre-bent sleeves and ergonomic cut for exceptional freedom of movement.

3M reflective features for enhanced visibility.

Climate regulation at the waist for optimum ventilation.

Advanced 3-layer breathable GORE-TEX® fabric keeps you dry, warm and ventilated.

Reinforced GORE-TEX® fabric on the sleeves and pockets for extra durability.

GEAR UP FOR EXTREME MOBILITY.

The new generation Tool Carriers

You know the drill. Always on the move. From the car to the workplace, from one spot to another. When you need that special tool you need it now. In essence, you want easy access to your tools at all times. That's what the new generation of tool bags and belts from Snickers Workwear is all about. Designed with cutting-edge ergonomics and functionality for extreme mobility at work.

SMART TOOL CARRYING.

With our pioneering Flexi Tool Bag/Backpack, you can carry your essential tools on your back – leaving your hands free for other things or for safely climbing a ladder.

The hard-wearing Flexi Tool Bag features ergonomically curved design for convenient carrying along the side of your body.

DURABLE MATERIALS.

The Flexi Tool Bags and Tool Bag/Backpacks feature robust rubber-clad aluminium handles. The hardwearing bottoms in rubber-plastic reduce the risk of leaving marks on the floor and prevent the tool bags from sliding around in the car.

EASY ACCESS TO YOUR TOOLS.

Count on superior overview and access to your tools. All Flexi Tool Bags and Tool Bag/Backpacks feature tool loops, compartments, elastic cords, multi-purpose pockets and dedicated holders for your cordless drill.

The new XTR Toolbelt is available in two special versions, for carpenters and electricians.

XTR – THE ULTIMATE TOOLBELT.

Our new advanced XTR Toolbelt takes mobile tool carrying to yet another level. It features a unique pocket attachment system that allows you to place the durable leather pouches exactly where you want them.

TOOL CARRIERS

9822 Flexi Tool Bag 30 L

Cutting-edge tool bag with advanced ergonomic design and outstanding functionality, giving you easy access to your tools at all times. Hardwearing and flexible with a range of tool compartments, keeping your gear in place when on the move.

- Ergonomically curved design and outside padding for added comfort and convenience when carrying at the side of your body
- Foldable, rubber-clad aluminium handle – folds down for superior overview and access to your tools, locks in upright position for steady carrying
- Durable tool loops and compartments, including dedicated holders for cordless drills, and an easy-access, multi-purpose pocket with protective flap
- Hard-wearing bottom in rubber-plastic, reduces the risk of leaving marks on the floor and prevents the tool bag from sliding around in the car
- Ergonomic and padded shoulder strap for superior carrying comfort, while its anti-slip material keeps the tool bag from sliding off your shoulder

Material: Hard-wearing EVA base and robust PE-boards with textile interior (polyamide).

Size: 530 x 280 x 350 mm.

9820 Flexi Tool Bag 15 L

Material: Nylon string, Plastic housing.

0400

9736 Hammer Holder
Display box, 10 pcs

9716 Hammer Holder

Advanced, hard-wearing hammer holder with ergonomic design. Angled for easy access and comfortable positioning of the hammer against the leg.

- Ergonomically angled design prevents the hammer-handle from hitting your leg when walking and getting in the way when bending down on your knees
- Easy to attach to Snickers tool fasteners, trousers, belts, Toolvest and FlexiPocket system
- Angled slightly away from your body for easy access to the hammer
- Accommodates most hammers in the market
- Made in a hard-wearing yet flexible material that will not scrape delicate surfaces

Material: 100% Thermoplastic Elastomer (TPE).

0000

9082 Flexi Hammer Holder

A popular standard. A metal hammer holder that features a smart, secure design. Ready for on-the-job action.

- Fits tool fasteners on Snickers trousers and waistcoats and Snickers FlexiPocket system

Material: Metal.

Size: One size.

4192 Craftsmen Toolvest, DuraTwill

Upgrade to unlimited flexibility at work. Wear this toolvest made in durable DuraTwill fabric and your essential, on-the-job tools are always within easy reach – while evenly distributing your load.

- A versatile toolvest with mesh construction for superior ventilation
- Velcro fasteners for maximum flexibility with Snickers attachable holster pockets or Snickers tool carrying system
- Integrated inside expander means the tool vest can be easily expanded and worn over a jacket
- Wide shoulder straps spread the load for working comfort
- Adjustable ergonomic belt takes pressure off the shoulders

Material: DuraTwill. 52% Cotton 48% Polyamide, 240 g/m². 100% Polyester mesh.

Size: XS-XXL.

7404

4294 Craftsmen Toolvest, Canvas+

Versatility without limits. The ultimate Toolvest for keeping your on-the-job essential tools within easy reach – while evenly distributing the load.

- A flexible Toolvest in Canvas+ with mesh construction for superior ventilation and strength
- Velcro fasteners for maximum flexibility with Snickers attachable holster pockets or Snickers tool carrying system
- Integrated inside expander means the tool vest can be easily expanded and worn over a jacket
- Wide shoulder straps spread the load for working comfort
- Adjustable ergonomic belt takes pressure off the shoulders

Material: Canvas+. An extremely comfortable, rugged fabric. 60% Cotton, 40% Polyester, 340 g/m². 100% Polyester mesh.

Size: XS-XXL.

9504

PROTECT YOUR BACK.

For heavy tool carrying distributing the load will save your back. Our advanced Toolvest with wide shoulders and integrated ergonomic belt is designed to ensure working comfort.

The integrated waist belt takes the weight off your shoulders. Can be worn in two positions, on the outside...

...or inside of the toolvest for optimum protection. The choice is yours.

Comes with a built in expander, which means the tool vest can be easily expanded and worn over a jacket.

FREEDOM OF MOVEMENT.

Experience work wear that works – and moves – with you. The Snickers Workwear range of T-shirts, polo shirts, sweaters and shirts feature ergonomic designs for true freedom of movement and outstanding working comfort.

MORE THAN GOOD LOOKS.

Contemporary design is just the beginning. With our inspiring range of cuts, quality fabrics and colours you'll get hard-working garments designed to work in. For real.

FUNCTIONALITY EVERYWHERE.

We know what it takes to get the job done. Several of our T-shirts and polo shirts feature our patented MultiPockets™ convenience, allowing you to lean forward without your mobile phone falling out.

Patented MultiPockets™
Patent No EP 1.684.605

HIGH-QUALITY MATERIALS.

All our garments are made in durable materials with specific qualities for each garment. Sturdy yet comfortable fabrics, easy care finish, UV protection and advanced breathable materials are just a few examples.

THE RIGHT MATERIAL FOR THE RIGHT TASK.

Your job and working environment determine the choice of material for your top wear. Take for example our polo shirts that are available in three different fabrics. For durable yet outstanding soft comfort choose our 100% heavy pre-washed cotton. For even more durable and easy care qualities, including maintaining colour and shape when washed at 85° C, our smooth polyester cotton is the perfect choice. And for truly dry and fresh working comfort in the heat, our high-tech, breathable A.V.S. fabric gives you true anti-odour comfort and UV protection.

The Snickers Workwear women's range is all about one thing; uncompromised functionality, working comfort and protection, specifically designed for women. Take our work trousers for example, they feature a low woman's cut, Twisted Leg™ design and Snickers Gusset™ in the crotch for a modern female fit and maximum freedom of movement.

FREEDOM OF MOVEMENT.

The Snickers Workwear women's range features advanced design for a contemporary female fit with outstanding freedom of movement.

FEMALE FIT.

Every garment in our women's range is cut specifically for women. Our advanced work trousers, for example, feature a low cut waist and a perfect fit for the female form.

FUNCTIONALITY AT WORK.

Designed for women – without compromising on functionality. Velcro tool fasteners, front and holster pockets, ruler pocket and a mobile phone compartment ensure that you have everything you need within easy reach.

CERTIFIED KNEE PROTECTION.

Working on your knees takes its toll. That's why our work trousers and kneepads with the patented KneeGuard™ positioning system give you the most advanced, certified knee protection available. So you can protect yourself today – and save your knees for tomorrow. Read more about our range of cutting-edge kneepads on page 35.

Low-cut waist.

Our advanced 3-series women's work trousers feature a low-cut waist and a perfect fit for the female form.

HIGH-VIS

STAND OUT.

Our cutting-edge range of High-Vis garments takes personal protection to the next level. Giving you the renowned Snickers Workwear functionality and working comfort - while making sure you are seen at all times.

A TRUE LIFESAVER.

We take personal protection seriously – without compromise. That's why for example our High-Vis jackets, T-shirts, polo shirts and vests feature reflective stripes all around, including over or across the shoulders so that you're highly visible from all directions – even when bending down.

VISIBLE COMFORT.

The Snickers Workwear unlined High-Vis jackets and trousers are made in working comfort cotton on the inside and dirt repelling polyester on the outside. A brilliant mixture for enhanced comfort and reduced risk of sweating.

DURABLE FABRICS FOR COLOUR-FAST PROTECTION.

Our High-Vis garments feature high-quality fabrics to ensure long-lasting protection. Thanks to a certain amount of durable polyester in each garment, they retain their shape and intense High-Vis colour and resist moisture, oil and dirt – wash after wash.

EN 471 High Visibility warning clothes This standard specifies requirements for clothing capable of signalling the user's presence visually. Performance requirements are included for colour and retroreflection as well as for minimum areas and for the disposition of the materials.

There are 3 different classes (class 3 is the highest class).

Class 3: Total fluorescent area must be at least 0.8 m² and 0.2 m² reflective material.

Class 2: Total fluorescent area must be at least 0.5 m² and 0.13 m² reflective material.

Class 1: Total fluorescent area must be at least 0.14 m² and 0.10 m² reflective material.

High-Vis Profiling

When customizing your High-Vis garments with company profiling, special requirements apply. Too large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us at Snickers Workwear for more information. We'll be happy to help you find the best solution to make your company stand out.

Note: High-Vis garments are not available in outside sizes (see size chart on page 122) due to the fact that they can't be certified according to EN 471. For example, small sizes don't have a sufficiently big fluorescent area.

FEEL FREE, AT WORK.

New Painters Collection – Perfect fit, amazing comfort.

Snickers Workwear introduces the new generation painters work wear. A cutting-edge range for hard-working men and women who deserve the best. With advanced ergonomic design and a perfect fit, our painter's collection combines outstanding comfort and freedom of movement with exactly the right built-in functionality you need to get your job done. Making your workday easier, safer and more productive. Painting has never been more enjoyable.

PERFECT FIT, AMAZING COMFORT.

Our new Painter's trousers feature an advanced ergonomic cut with Twisted Leg™ design for a perfect fit, outstanding working comfort and optimal freedom of movement.

FEMALE FIT.

All women's garments in our new Painter's Collection are cut specifically for women. The trousers feature a low cut with shaped waistband, and the Soft Shell jacket is designed with a perfect fit for the female form.

BUILT-IN FUNCTIONALITY.

Count on just the right functionality and reinforcements for the painter's needs. For example the hardwearing polyester-reinforced cloth holder loop, the putty tool/ruler pocket and patented knife fastener.

ADVANCED KNEE PROTECTION.

Save your knees with the most advanced certified knee protection available. The polyester-reinforced kneepad pockets are designed for the patented KneeGuard™ positioning system, giving you superior and durable certified knee protection that follows your every move.

The convenient cloth holder loop is polyester-reinforced for extra durability.

With the putty tool/ruler pocket and patented knife fastener for Hultafors knives you always have the essentials within convenient reach.

0909

3275 Painter's Holster Pocket Trousers

Free yourself at work in these cutting-edge painter's trousers combining advanced design with just the right functionality. Count on a perfect fit, amazing working comfort and superior certified knee protection.

EXTINGUISH DOUBT

The conditions you work in leave no room for compromises or doubt – especially in terms of potential risks from sparks, heat and flame. That's why we created a range of flame retardant clothing that combines an outstanding level of protection with the functionality and on-the-job comfort you expect from Snickers Workwear. The result is a collection that fulfils relevant safety norms and the demands of hard working professionals like you. Making every working day a safer, more comfortable experience.

CREATED TO PROTECT

Every garment is light to the touch and the material is soft, unlike other flame retardant collections that often feature heavy, uncomfortable treated material. This has not been done at the expense of safety, however. All our flame retardant garments fulfil the relevant safety standards set out in EN11612.

MATERIAL GAINS

The material used in our flame retardant trousers and jackets is specially permeated cotton, designed to protect on contact with flame, convective or radiated heat. Our underwear offers the same level of protection and thanks to the use of advanced material, also delivers outstanding breathability and comfort.

BUILT-IN FUNCTIONALITY

From underwear to a full welding overall, our range of garments represent superior functionality. Pockets and hems are sewn to facilitate easy access for hands and minimise access for sparks or welding bi-products. The trousers offer the most advanced certified knee protection available.

COMFORT WITHOUT COMPROMISES

It would be easy to design flame retardant clothing that sacrifices comfort for heavy, unwieldy materials – but that wouldn't be the Snickers Workwear way. Our range is soft, light, cool and features Twisted Leg™ design and pre-bent sleeves – anything for your comfort and freedom of movement.

 **EN 11612** This standard specifies performance for garments made from flexible materials, which are designed to protect the wearer's body, except the hands, from heat and /or flame.

CLASS OF GARMENT

- A – Limited flame spread**
- A1 – Surface ignition**
- A2 – Bottom edge ignition**
- B – Convective heat**
- C – Radiant heat**
- D – Molten aluminium splash**
- E – Molten iron splash**
- F – Contact heat**

 **EN 11611** This standard specifies minimum basic safety requirements and test methods for protective clothing including hoods, aprons, sleeves and gaiters that are designed to protect the wearer's body including head and feet and that are to be worn during welding and allied processes with comparable risks.

- A1:** Indicates that the garments meet the requirements for limited flame spread for surface ignition.
- A2:** Indicates that the garments meet the requirements for limited flame spread for bottom-edge ignition.

- Class 1:** Manual welding techniques with light formation of splatters and drops.
- Class 2:** Manual welding techniques with heavy formation of splatters and drops.

EN 1149-5 This European Standard specifies material and design requirements for electrostatic dissipative protective clothing, used as part of a total earthed system, to avoid incendiary discharges. The material shall meet

requirements according to EN 1149-1 (Surface resistance) or 1149-3 (Induction charging). The requirements may not be sufficient in oxygen enriched flammable atmospheres. This European Standard is not applicable for protection against mains voltages.

FLAME RETARDANT

9437 Flame Retardant Briefs

First layer flame retardant protection meets working comfort. Briefs made in moisture transporting fabric with a soft touch all over cotton feeling. Conforms to EN11612 and EN1149 Anti static.

- Fulfils EN11612 (A1,B1,C1) and EN1149-5 Anti static norms
- High-stretch material with soft, all over cotton feeling for a more comfortable fit
- Advanced heat and flame reactive material that solidifies with heat and provides permanent flame protection
- Insulating and moisture transporting fabric keeps you warm and fresh
- Waistband designed for maximum comfort

Material: 60% ModAcrylic, 40% Cotton with anti static 1x1 rib 220 g/m².

Size: XS-XXXL.

0400

9447 Flame Retardant Long Johns

Stay warm with this complete lower body flame retardant protection, next to your skin. Features insulation and moisture transporting fabric for superb comfort in any conditions. Conforms to EN11612 and EN1149 Anti static.

- Fulfils EN11612 (A1,B1,C1) and EN1149-5 Anti static norms
- High-stretch material with soft, all over cotton feeling for a more comfortable fit
- Advanced heat and flame reactive material that solidifies with heat and provides permanent flame protection
- Elastic hems enhance garment insulation and increase protection
- Insulating, moisture transporting fabric regulates temperature and increases comfort

Material: 60% ModAcrylic, 40% Cotton with anti static, 1x1 rib 220 g/m².

Size: XS-XXXL.

0400

9257 Flame Retardant Socks

Flame retardant and electrostatic charge protection through advanced material and construction. Soft to touch with all over cotton feeling. Features heel and toe reinforcements for enhanced durability. Conform to EN11612 and EN1149 Anti static.

- Fulfils EN11612 (A1,B1,C1) and EN1149-5 Anti-static norms
- Anti-static protection helps prevent charge building up in your body
- Soft, all over cotton feeling for a more comfortable fit
- Insulating, moisture transporting fabric regulates temperature and increases comfort
- Advanced heat and flame reactive material that solidifies with heat provides permanent flame protection

Material: 28% ProtexM® (Acrylic), 23% cotton, 23% Wool, 21% Polyamide, 4% Lycra, 1% Belltron.

Size: 37/39, 40/42, 43/45, 46/48.

UK sizes: 4-6, 6½-8, 8½-10½, 11-13.

CUSTOMISED PROTECTION.

Explore our exciting range of accessories and create your own personal solution that supports your specific on-the-job needs. Count on added protection and convenience with every product.

PROTECT YOUR HEAD.

A lot of your body heat escapes through the head – so use a beanie or cap when it's cold outside. Under a blazing sun, a protective cap makes all the difference.

PROTECT YOUR HANDS.

Your hands are one of your most important tools. Even the strongest hands should be handled with care. Experience how the advanced design of our work gloves helps you protect them and keep them warm.

EN 388 Gloves Giving Protection from Mechanical Risks

This standard applies to all kinds of protective gloves in respect of physical and mechanical aggressions caused by abrasion, blade cut, tearing and puncture. Protection against mechanical risks is expressed by a pictogram followed by four numbers (performance levels), each representing test performance against a specific risk. The performance level is from 1-5, where 4 or 5 is the best result.

- a. Resistance to abrasion:** based on the number of cycles required to abrade through the sample glove.
- b. Blade cut resistance:** based on the number of cycles required to cut through the sample at a constant speed.
- c. Tear resistance:** based on the amount of force required to tear the sample.
- d. Puncture resistance:** based on the amount of force required to pierce the sample with a standard sized point.

In all cases, 0 indicates the lowest level of performance, as follows.

These are the requirements for each performance levels. The performance level is displayed alongside the pictogram.

Performance level	0	1	2	3	4	5
a. Abrasion resistance (cycles)	<100	100	500	2000	8000	–
b. Blade cut resistance (factor)	<1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	<10	10	25	50	75	–
d. Puncture resistance (newton)	<20	20	60	100	150	–

EN 511 Gloves Giving Protection from Cold

This standard applies to any gloves to protect the hands against convective and contact cold down to –50 °C. Protection against cold is expressed by a pictogram followed by a series of 3 performance levels, relating to specific protective qualities.

- a. Resistance to convective cold:** Performance level 0–4.
Based on the thermal insulation properties of the glove which are obtained by measuring the transfer of cold via convection.
- b. Resistance to contact cold:** Performance level 0–4.
Based on the thermal resistance of the glove material when exposed to contact with a cold object.
- c. Permeability by water:** 0 or 1.
0 = water penetration after 30 minutes of exposure. 1 = no water penetration.

X=performance level not tested.

All gloves must also achieve at least performance level 1 for abrasion and tear according to EN 388.

No seams at fingertips for maximum comfort.

Grip Tech reinforcements for unbeatable grip and durability.

Soft and breathable Chamude® material.

Superior protection with perfect fit.

9518 Craftsmen Glove

The new rugged performance standard. Provides an unbeatable grip, uncompromising protection and a superior fit – perfect for really tough jobs.

- Designed with Chamude® – a soft light material – breathable and washable
- Palm and fingers are reinforced with Grip Tech, a durable rubber with an advanced textured surface, for an unbeatable grip and extra durability
- 4-way stretch nylon for perfect fit and comfort
- Meets EN 388 Mechanical risk

Material: 55% Nylon, 20% Polyester, 12% PVC, 9% Polyurethane, 4% Cotton.

Size: S/7-XXL/11.

0400

9519 Grip Glove

True handling performance. Ensures an uncompromising grip even on smooth surfaces, while it supports and protects – a pleasure to work with.

- Designed with Chamude® – a soft light material – breathable and washable
- 4-way stretch nylon for perfect fit and comfort
- Palm covered with PU web for maximum grip
- Meets EN 388 Mechanical risk

Material: 68% Nylon, 12% Polyester, 16% Polyurethane, 4% Cotton.

Size: S/7-XXL/11.

1800

9517 Winter glove, water proof

Extreme protection in action. Lined, watertight winter gloves that breathe for the best possible protection – a must in cold or stormy weather. Designed for maximum protection from the elements, working comfort, and solid grip.

- Designed with Chamude® – a soft light material – breathable and washable
- Palm and fingers are reinforced with Grip Tech, a durable rubber with an advanced textured surface, for an unbeatable grip and extra durability
- 4-way stretch nylon for perfect fit and comfort
- Meets EN 388 Mechanical risk and EN 511 Protection against cold

Material: Shell in 56% Nylon, 20% Polyester, 12% PVC, 8% Polyurethane, 4% Cotton. Lining in 100% Micro Fleece Polyester with 100% Polyurethane membrane.

Size: S/7-XXL/11.

0418

9520 Craftsmen Glove, Open Finger

For extra control and flexibility when working with smaller tools, screws and nails – without having to give up a superior grip.

- Designed with Chamude® – a soft light material – breathable and washable
- Three cut fingers for extra control and flexibility, ideal for detail work
- Palm and fingers are reinforced with Grip Tech, a durable rubber with an advanced textured surface, for an unbeatable grip and extra durability
- Meets EN 388 Mechanical risk

Material: 45% Nylon, 18% Polyester, 17% PVC, 16% Polyurethane, 4% Cotton.

Size: S/7-XXL/11.

- Can be attached in the side of the trousers, in the Velcro tool fasteners
- Keeps the trousers up without restricting your movements

Material: Polyester 66%/Rubber 34%.

Size: One size.

QUALITY EMBROIDERY

With embroidery you get quality with every stitch, but remember that words or symbols smaller than 5 mm can be difficult to read.

A.P.S. AND GORE-TEX® PROFILING

When profiling your waterproof garments, heat sealing is the way to go. If you prefer embroidery, we will tape the rear of the embroidery to make sure the garment retains its waterproof characteristics.

FLEECE PROFILING

For a company-profiled fleece, embroidery is the obvious choice since heat-sealing might leave marks in the fabric.

REFLECTIVE STRIPES

We can sew additional reflective stripes onto your work trousers and jackets. A cost-efficient solution to boost your personal protection.

HIGH-VIS PROFILING

Profiling High-Vis garments is rather special. Excessively large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us for more information.

T-SHIRT PROFILING

Heat-sealing is the best choice when profiling your company T-shirts. Count on high quality in any size and colour.

3314 Craftsmen Trousers, Canvas+, page 24
2504 T-shirt with MultiPocket™, page 75

3214 Craftsmen Holster Pocket Trousers, Canvas+, page 24
1212 Soft Shell Jacket, page 41

SHOW YOUR LOGO

When done right, company profiling pays off. It is a stamp of quality that says a lot about you and your company. It helps your company stand out, making it more distinct and recognised for the right reasons. With Snickers Workwear you know that you are turning to the experts – offering a complete range of value adding services and product options. The right colours, customised embroidery and personalised packaging, just to name a few. Contact us today for all the inspiring details.

Our embroidery embodies quality with every stitch. Giving your workwear an image boost that stands out in all the right ways – for a long time to come.

With our advanced heat-sealing technique you get distinctive high-quality prints in the sizes and colours of your choice.

At Snickers Workwear we only use high-quality threads to make sure your company logo stands out in the long run.

For the ultimate in company profiling, don't hesitate to talk to our experts. They know what works best and can suggest a cost-efficient solution designed for you and your company.

PERSONALISED PACKAGING

When you order a range of garments for all employees we have the perfect service for you: personalised packaging. That means everyone gets all his or hers garments in a package labelled with their name. This facilitates easier internal distribution at your company and guarantees that everybody gets the right garments and the right sizes. Easy, convenient and personal.

COMPANY PROFILING

HIGH TECHNOLOGY AT WORK

At Snickers Workwear, we are driving the application of advanced materials in work wear design, taking advantage of the latest technological developments, when and where it can improve on-the-job comfort, protection and durability.

GORE-TEX® MATERIALS

GORE-TEX® Technical Garments are extremely durable, waterproof to keep you dry, windproof to keep you warm, and breathable to keep you comfortable – all day long. The GORE-TEX® membrane has over 1.4 billion pores per square cm. The pores are 20,000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapour. This prevents water from penetrating, while it aids your body's natural cooling process by allowing perspiration vapour to escape. Special GORE-SEAM® tape ensures that all seams are 100% water proof.

WINDSTOPPER® MATERIALS

WINDSTOPPER® materials combines total windproofness with maximum breathability to keep you warm and comfortable:

- The Windproofness protects your body's warmth from the chilling effects of wind and weather.
- Maximum breathability prevents overheating and perspiration build-up by allowing moisture vapour to escape easily.

A durable water repellent finish provides additional weather protection.

A.I.S. ACTIVE INSULATION SYSTEM

A lightweight and soft micro fleece fabric. It is an ideal mid-layer for any outdoor activity with its insulating and high moisture transportation ability. This will keep you warm, dry and comfortable. Available in two versions: with and without a windproof membrane.

A.V.S. ACTIVE VAPORIZE SYSTEM

A lightweight and high-tech fabric. This garment has outstanding breathability which will keep your body dry and comfortable during hard activity.

A.P.S. ACTIVE PROTECTION SYSTEM

Will keep you dry and comfortable during hard conditions. This 3-layer construction is developed to keep wind, water and dirt out while maintaining high breathability.

CORDURA®

Material: 100 % polyamide. Features: Cordura® by Invista is a high technology fabric made with air-textured polyamide fibres able to meet the toughest standards of strength and durability – yet remain light and stylish. Because it is an extremely tough and hardwearing material, we use it to reinforce exposed parts on Snickers garments such as pockets, knees and sleeves. It is also water and dirt repellent, easy to care for and retains its shape.

SUPERFABRIC® brand materials

SuperFabric® brand technology is an advanced, multi-step engineered process that takes ordinary fabrics and transforms them into a variety of unique, protective solutions, known collectively as **SuperFabric®** materials. These new protective fabrics are engineered for optimum resistance to cuts, punctures and abrasions while remaining highly flexible. Optional properties such as flame resistance, specialized grip and more make for a complete customized solution.

COOLMAX®

Coolmax® fabrics are designed to move moisture away from the body and enhance fabric drying rate, thus keeping you feeling cool and dry. Coolmax® moves perspiration, through channels in the fibres structure away from the body to the fabric's outer surface, where it can evaporate quickly. The performance of Coolmax® is inherent in the fibres structure itself, thereby providing consistent performance wash after wash. The soft, lightweight and breathable fabric gives clothes a natural feel with an added touch of performance that keeps them comfortable and brings cool comfort to everyday apparel.

UV-PROTECTION

Too much direct sunlight can damage the skin. Snickers UV-protected garments has a UPF (Ultraviolet Protection Factor) of 40+ or 50+. Snickers garments are tested in accordance with the international standards; EN 13758 and AS/NZS 4399:1996.

CONFIDENCE IN TEXTILES

The International Oeko-Tex® Association is an independent test institute, testing textiles for harmful substances according to Oeko-Tex® Standard 100 for textile products of all types which pose no risk whatsoever to health. The Oeko-Tex® label indicates the additional benefits of tested safety for skin-friendly clothing and other textiles.

MEASURE RIGHT – FOR A GOOD FIT

The best way to ensure you get optimally fitting garments is to try them on for real. If that is not possible we recommend that you follow our measuring tips carefully to make sure you get the right size. Snickers Workwear keeps all standard sizes in stock for speedy deliveries (see specific garment for the standard size range). We also offer special sizes – it may take a little longer, but it's well worth it.

IMPORTANT MEASUREMENT TIPS

1. Get help from someone else to take your measurements.
2. Take measurements dressed in body-tight underwear.
3. Measure tight against/around your body, but without the measuring tape being pulled so hard that it “cuts” in.
4. When measuring the inside leg, make sure the measuring tape is firmly extended.

A. Body length

Top of the head to the sole of the foot

B. Chest

Chest width, horizontally at the widest point.

C. Waist

Waist width, horizontally at navel height. Note! If you have a large stomach it's better to use your seat measurement to find the right trouser size. But if you measure for a one-piece or overall, the waist measurement has to be taken into consideration.

D. Seat

Seat width, horizontally at the widest point.

E. Inside leg

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

SIZE M
MEN

Every CE-marked garment has to have a label with a pictogram that shows the size and the body measurements of the person that the garment is intended for. This means that you always can check inside the garment to see the size.

ABOUT ADJUSTED SIZES

Snickers Workwear is continuously adjusting the sizes in order to follow CEN – the European Committee for Standardization. This means new products can be perceived as having “a smaller fit” compared with the rest of the range. These new products are marked with: *New adjusted fit*.

Please
note!

ALL MEASUREMENTS ARE BODY MEASUREMENTS. Measure carefully to find your size.

 = Sizes within the blue frame are Standard Stock Items

 = Sizes within the shaded area are outside sizes. Outside sizes are available to order with lead time and 50% extra surcharge. Minimum order is one pcs per size.

Symbols Key

These symbols will help you find the right garment. They are used as guides in the product descriptions contained in this brochure. The following definitions apply:

Personal Protective Equipment (PPE). When the CE mark is used alone in our trouser descriptions, it refers to knee protection. It is also used to show that our work gloves fulfill CE standards.

EN 343 Protection against foul weather

EN 471 High Visibility warning clothes

EN 388 Gloves giving protection for mechanical risks

EN 511 Protective gloves against cold

EN 11611 Welding protection

EN 11612 Heat & flame protection

EN 1149 Electrostatic properties

Patent and Registered Community Design (RCD)

Innovation and product development are at the very core of the Snickers Workwear brand. As a result of this intense focus, many of our advanced products or solutions feature registered patents. Many products are also covered by Registered Community Design (RCD). In this catalogue, products with registered design or with functions included in patent applications or patents are marked with the symbols below. For further information, please visit snickersworkwear.com.

This product is patented or has a patent application in selected countries both within Europe and world wide.

This product has a Registered Community Design (RCD), or national design registrations.
