5000 – the new superlative JOOLA table

The JOOLA 5000 starts a new chapter in the 50-year-old story of success of JOOLA table tennis table production. For the first time in history, the legendary JOOLA table top is available with a thickness of 25 mm. This guarantees a 100% even bounce of the ball on any part of the playing area – no sliding, naturally a quick and high ball bounce as on all JOOLA competition tables.

In addition the JOOLA 5000 impresses with a new, convenient and ultra-modern undercarriage.

Even national coach Jörg Roßkopf was overwhelmed by the clean bounce of the ball when testing the JOOLA 5000 for the first time: "I played my first strokes at the age of 8 on a JOOLA table and I have won almost all major titles on JOOLA tables, but this new table with the 25mm top exceeds anything. The ball bounces cleanly but is still quick. Sliding of the ball is almost impossible on this table. In my opinion this is the perfect table tennis table, unique worldwide!"

5000

- original JOOLA competition table top, 25 mm
- extremely fast playing surface through special processed polyester coating
- metal frame 60 mm
- automatic system
- stable, powder-coated metal undercarriage
- height adjuster
- stable construction with automatic legs
- large 150 mm wheels for easy transport
- double anti-tilting device
- corresponds with Norm EN 14468-1 A high performance sports

SHOWCOURT ITTF

Official table of the finals of the WORLD CUP 2006, the ASIAN GAMES 2006, the PRO TOUR Tournaments in Qatar and Japan 2007 and the World Junior Championships in the USA 2007.

With the original and legendary 22 mm JOOLA competition table top: Extremely fast playing surface due to the specially processed polyester coating, metal frame. Stable metal under-carriage encased in a sturdy plastic surround, permanently connected to bottom of table top (not foldable) for stationary use.

Available in the design of the World Cup 2006 or, on request and subject to a surcharge, in any other design of the encasing. An indirect illumination of the encasing is also available at extra cost.

Also available, on request, with green table top.

Quality at the highest level!

ROLLOMAT

- original 22 mm JOOLA competition table top
- extremely fast playing surface due to special processed polyester coating
- metal frame 50 mm
- transport system – four wheels on each half
- stable, powder-coated metal undercarriage
- double anti-tilting device
- low storage space
- ideal for clubs with heavy usage
- corresponds with EN 14468-1 A

Art. 11340 green

Art. 11341 blue

DUOMAT

- original 22 mm JOOLA competition table top
- extremely fast playing surface due to special processed polyester coating
- metal frame 50 mm
- transport system - four wheels on each half
- stable, powder-coated metal undercarriage
- double anti-tilting device
- low storage space
- ideal for clubs with heavy usage
- corresponds with EN 14468-1 A

Art. 11319 green
Art. 11420 blue

2000-S

- original 22 mm JOOLA competition table top
- extremely fast playing surface due to special processed polyester coating
- metal frame 50 mm
- classic trestle table design
- stable, powder-coated metal undercarriage
- proven, stable construction
- easy installation due to perfect folding mounting
- each half with 2 stable wheels for comfortable transport
- corresponds with EN 14468-1 A

Art. 11324 green

293 kg

CITY

- table made of an acrylic resin/silica sand mixture
- playing surface coated with a layer of acrylic resin, thus very even and free of pores and providing proper playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- undercarriage made of solid rectangle tube 50/40 mm, hot-dip galvanised, dismountable
- erection by two persons without any problems, despite a total weight of 293 kg (the heaviest part only weighs 78 kg)
- because its very solid construction ideal for public places, schoolyards, camping grounds
- hard standing is not necessary, only level ground
- corresponds with EN 14468-1 C

Art. 11700 green

128 kg

EXTERNA

- table made of fibre-glass reinforced polyester
- very even surface for perfect playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- solid undercarriage made of substantial rectangle tube, hot-dip galvanised
- easy assembly of legs
- due to its very solid construction, ideal for public areas, school playgrounds, camping sites
- hard standing is not necessary, only level ground
- weight 128 kg
- corresponds with EN 14468-1 C

Art. 11800 blue

Net CITY

- suitable for table city
- very stable full metal construction, weatherproof
- very substantial and difficult to maliciously remove from the table

Art. 31018

Net EXTERNA

- suitable for table externa
- very stable full metal construction, weatherproof
- very substantial and difficult to maliciously remove from the table

MINI

- Fun table
- Net and post set included
- Dimensions: 90 x 45 cm, height 76 cm

Art. 19100 blue

SUNNY

- assembled ready-to-play - unpack, swing open, have fun!
- 22 mm improved sandwich aluminium plates
- appealing plastic frame 50mm
- stable, powder-coated metal undercarriage
- Super-compact-System
- can be easily set up or dismantled
- anti-tilting device
- absolute weatherproof table with excellent playing features for the ambitious leisure player
- corresponds with European Standards EN 14468-1 C leisure sports (high quality)

Art. 11620 blue

OUTDOOR TR

- 22 mm improved sandwich aluminium plate
- appealing plastic frame 50mm
- stable, powder-coated metal undercarriage
- transport system - four wheels on each half
- can be easily set up or dismantled
- anti-tilting device
- absolute weatherproof table with excellent playing features for the ambitious leisure player
- corresponds with European Standards EN 14468-1 C leisure sports (high quality)

Art. 11610 blue

LIBRE

- weatherproof plastic net in a suitable bag
- leading model with adjustable height and clamping technique
- adjustable net tension
- favourable price
- corresponds with EN 14468-2 B

Art. 31016

OUTDOOR

- favourable priced, weatherproofed plastic net and post set in bag
- adjustable net tension
- corresponds with EN 14468-2 C

Art. 31015

NEW

WM ULTRA

- top model for competition
- ITTF approval
- pressure plate and contact area with rubber protection
- large contact area
- large 14mm-mounting screw
- solid metal body
- micro vertical adjustment system
- cotton-iron yarn net
- corresponds with EN 14468-2 A
- high-performance sports

Art. 31035

WM

- top model
- solid metal body
- net made of cotton-steel thread
- micro vertical adjustment system
- ITTF approval
- corresponds with EN 14468-2 A

Art. 31030

SPRING

- solid competition net and post set
- net made of cotton-steel thread
- micro vertical adjustment system
- clip system with strong spring snap clamp
- ITTF approval
- corresponds with EN 14468-2 A

Art. 31050

EUROPALIGA

- extra solid metal net and post set
- micro vertical adjustment system
- storing bag included
- excellent price to quality ratio
- corresponds with EN 14468-2 A

Art. 31025

PERMANENT

- stationary net and post set especially for table ROLLOMAT and OLYMP from construction year 2003 on
- disassembly not necessary
- corresponds with EN 14468-2 A

Art. 31041

KLICK

- solid metal net and post set with vertical adjustment
- clip system
- corresponds with EN 14468-2 B

Art. 31011

ELECTRONIC counter

The first electronic counter specially designed for table tennis, at an affordable price. Very easy to handle, no previous knowledge necessary, ready to use in seconds. Battery or power supply possible (batteries and power supply unit are not included) – economical consumption. Also suitable for other sports. Display large numbers up to 99, small numbers up to 9.

Art. 22430

STANDARD scorer

Practical plastic construction. Space-saving practical design to protect against damage. With additional pockets for "TIME-OUT" and "HOME/GUEST" display. Numbers 0-30.

Art. 22410

POINTER scorer

Robust, durable manufacture, easy to handle, simple to set up and take down with an attractive design. JOOLA scorer pointer is ideal for club use as even when intensively used the plastic parts won't pull out. Includes time out cards.

Art. 22404

RESULT scorer

Compact plastic scorer with numbers 0-30.

Art. 22402

BALL COLLECTOR

Handy „Ball-Collector“ with a practical telescopic pole which makes collecting the balls after each training session a lot easier. Foldable upper part, therefore very little storage space required. Collection net opening: 40cm, Total length: 2m

Art. 22720 black

TOWEL BOX

Practical, low-priced and stable towel box. Suitable for multi use.

Art. 22545

UMPIRE TABLE

Matching the JOOLA scorer. Elaborate folding construction, no lose parts, with carrying handle for easy transport. Chosen for many international events and suitable for club use. L 76 cm, H 69 cm, D 34 cm.

Art. 22500

TT-BUDDY PRO

The TT-BUDDY PRO was awarded with the Plus-X-Award Seal of Approval in the categories design and functionality this year. The judging panel accredited the TT-BUDDY not only a great design, but also noted the simple and logical operability of the TT-BUDDY. The advanced TT-BUDDY PRO with a built-in oscillator and remote control.

The PRO version is also set up and ready to use in seconds. The ball frequency of the robot can be adjusted from 20 to 70. Underspin and topspin as well as oscillation speed are adjustable.

- Weight: approx. 1.1 kg
- Dimensions: 48 x 28 x 28 cm

Art. 21129

Net TT-BUDDY

Economically priced, practical ball collection net for the TT-BUDDY. Easy and fast assembly, fits on the table with nets on the sides. The collected balls fall into a container or bucket (not included) through an opening, making it simple to refill the tt buddy ball container. Colour: black

Art. 21128

TT-BUDDY

The TT-BUDDY is an innovative robot in modern design. It plays chop, topspin or heavy topspin balls and holds up to 100 balls. Due to its size and easy operation it is the perfect training buddy, suitable for leisure or club players.

Technical features:

- Fast setup with no tools or extra equipment necessary
- Variable frequencies: from 12 balls/min - 70 balls/min
- 3 different spins: underspin, topspin, heavy topspin
- Easy & simple controls
- Very low weight (approx. 1.1 kg)
- Easy storage (Dimensions: 48 x 28 x 28 cm)

Art. 21127

TT-BUDDY TOPSPIN

The TT-BUDDY TOPSPIN is the ideal training partner for beginners. The ball frequency can be easily programmed with the remote control. Topspin balls are ejected, the ball compartment holds 100 balls. The TT-BUDDY TOPSPIN is set up and ready to use within seconds.

- Spin type: Topspin
- Batteries: 6AA batteries (not included), can also be powered by an adaptor
- Weight: approximately 1,1 kg
- Dimensions: 48 x 28 x 28 cm

Art. 21130

A/C ADAPTER

Suitable for use with all Buddy robot models

Art. 21149

Robot **SHORTY**

The multifunctional table robot JOOLA ROBOT SHORTY is very easy to operate. Variable speed, 8 different rotation modes, different trajectories and oscillation provide a variety of training and application.

Collecting net, remote control, large ball container and very easy installation and dismantling make the JOOLA ROBOT SHORTY an indispensable device for all training needs.

MAXXXIMUM SUCCESS

Daniel Habesohn
European Champion Doubles 2012

Early last year, JOOLA started a project together with the help of top players and outstanding design engineers in the polymer industry with the goal to develop a rubber composition that enables table tennis on a level never reached before. The expectations of players with different performance levels in a rubber were evaluated in a study – 3 features were specified as key X factors for successful, modern table tennis. These were then the target for the subsequent test series: maXXXimum power, maXXXimum spin and maXXXimum control.

After long development and test phases we have reached our goal with the JOOLA MAXXX® – the rubber exceeds all expectations and will definitely belong to the best in the world.

Geo-Force and **Geo-Sponge** are the keys to success: two innovative development steps – the unique geometry of the grippy upper rubber and the new macropore high-tech comb sponge.

The JOOLA Geo-Force technology of the upper rubber, where the pimples are specially arranged and form a larger hollow space, sets complete new standards when speaking of ball control and rotation. The spin performance at the table as well as from half distance turn the JOOLA MAXXX® into an efficient high-end weapon.

The new macropore comb structure of the dynamic sponge (Geo-Sponge technology) gives the player an incomparable feeling, a dangerous ball-flight when playing topspin shots and unbeatable power in every playing situation.

JOOLA MAXXX® –
the rubber with the Triple X:

MaXXXimum power

MaXXXimum spin

MaXXXimum control

MAXXX® 400

Pimples in. 1.8, 2.0, max. mm.

The rubber with the softest sponge of the MAXXX series (40°). Recommended for aggressive allrounders who emphasize control but don't want to do without the necessary power in performance.

Art. 70320

Strategy	ALL/OFF
Speed	fast/extreme
Spin	extra high
Control	high/extra high
Hardness	40°

MAXXX® 450

Pimples in. 1.8, 2.0, max. mm.

The dynamic 45° Medium Geo Sponge in combination with the new upper rubber surface provides the optimum mixxx of power, spin and ball response. Ideal for spin-oriented attackers, also playing from half distance, who emphasize ball feeling.

Art. 70326

Strategy	OFF-/OFF extreme
Speed	extreme
Spin	extra high
Control	high
Hardness	45°

MAXXX® 500

Pimples in. 2.0, max. mm.

The fastest and most dynamic rubber of the MAXXX series. The rubber is hard due to the 50° sponge, which is being used for the first time worldwide. However, the new dynamic macropore comb combination (Geo Sponge Technology) and the new pimple geometry (Geo-Force Technology) provide extreme sensitive feeling and good spin. Ideal for players with a busy training schedule who prefer harder rubbers and have been on the lookout for the 3 X-factors of a rubber.

Art. 70333

Strategy	OFF/OFF extreme
Speed	extreme
Spin	extra high
Control	low/medium
Hardness	50°

RHYZM

Pimples in. 2.0, max. mm.

Especially developed for the topspin player who plays an aggressive offensive game with extreme power, dynamics and rotation. The new, extremely grippy and spin elastic upper rubber combined with the 48° sponge provides rotation and piercing force as never before. Despite the sensational power, JOOLA RHYZM offers extreme control in passive play, whether in a short touch game over the table, chopping or offensive topspin game. At all times JOOLA RHYZM provides a new dimension of playing fun.

The JOOLA RHYZM brings rhythm to the game.

Art. 70279

Strategy	OFF-/OFF extreme
Speed	extreme
Spin	extra high
Control	medium/high
Hardness	48°

RHYZM 375

NEW

Pimples in. 2.0, max. mm.

The advanced and grippy Rhyzm surface combined with the soft large-pored sponge, provide a special "groove" at the table. The ball contact time, extended by the soft sponge, provides precise ball response and highest control values in all playing situations. Especially when blocking, in counter duels or in return of service, the enhanced ball control is noticeable.

Art. 70287

Strategy	DEF extreme/OFF
Speed	fast
Spin	extra high
Control	extra high
Hardness	37,5°

RHYZM 425

NEW

Pimples in. 2.0, max. mm.

The JOOLA Rhyzm 425 is the ideal compromise for all players that expect a best possible ball response, but at the same time cannot do without the power of an extremely hard sponge, as preferred by table tennis professionals. The advanced Rhyzm surface guarantees full dynamics, extreme spin and fun when applying different spins. The Rhyzm 425 unfolds it's full potential especially in topspin rallies. Choose the Rhyzm 425 and experience fun in playing like never before!

Art. 70292

Strategy	ALL/OFF extreme
Speed	fast/extreme
Spin	extra high
Control	high/extra high
Hardness	42,5°

India*

X-PLODE

Pimples in. 1.8, 2.0, max. mm.

Since the banning of speed glue, the X-PLODE with incorporated speed glue effect caused a sensation among players, who were seeking an alternative for the speed provided by speed glueing. The spin elastic, very grippy upper rubber in combination with the medium hard, large-pored sponge characterise the X-PLODE. The unprecedented catapult effect and the sensational spin provide "x-plusive" strokes with unrivalled rotation.

Art. 70161

Strategy	ALL/OFF extreme
Speed	extreme
Spin	extra high
Control	medium
Hardness	47,5°

X-PLODE SENSITIVE

Pimples in. 1.8, 2.0, max. mm.

The softer version of the X-PLODE!

The sensitive-touch effect conveys ball feeling of a special kind. While the first ball contact is extremely sensitive and therefore controlled, the rubber shows its full power at the ball take-off: the ball catapults like an "ex-plo-sion" off the rubber.

The latest JOOLA Green Power technology in the X-PLODE SENSITIVE provides an unique, incorporated speed glueing effect!

Art. 70061

Strategy	ALL/OFF
Speed	fast
Spin	extra high
Control	high/extra high
Hardness	40°

Daniel Habesohn
European Champion Doubles 2012

ENERGY

Pimples in. 1.8, 2.0, max. mm.

Speed glue effect is incorporated to a new dimension: ENERGY in „GREEN POWER“ technology. With ENERGY GREEN POWER almost 100% of the possible increase in performance achieved by fresh glueing is permanently built in. Specially suited for players that prefer spin attack but demand control and precision.

ENERGY GREEN POWER - the new era has begun.

Art. 70080

Strategy	OFF/OFF
Speed	fast/extreme
Spin	extra high
Control	high
Hardness	42,5°

ENERGY 325

Pimples in. 1.8, 2.0, max. mm.

The ENERGY family has been expanded with an extremely soft version. The highly elastic upper rubber in combination with the 32.5 ° sponge boosts the ball contact time and causes a higher ball trajectory. Safe block balls, also against extreme topspin shots, are another feature of the new Energy 325. Players that want to be successful with a lot of control and safe topspins cannot avoid the Energy 325 !

Art. 70191

Strategy	DEF extreme/OFF
Speed	medium/fast
Spin	extra high
Control	extra high
Hardness	32,5°

ENERGY X-TRA

Pimples in. 1.8, 2.0, max. mm.

The ENERGY X-TRA is the next-stage development of the ENERGY, the alternative to speed glueing. The 37.5° soft sponge with the inclusive speed glue effect provides for even more spin and speed. It is especially suited to players who put emphasis on control of their strokes without giving up the advantages of speed glueing.

Green Power – incorporated speed glueing effect.

Art. 70090

Strategy	DEF extreme/OFF
Speed	fast

Control	extra high
Hardness	37,5°

SAMBA

Pimples in. 1.8, 2.0, max. mm.

Nothing sounds better! The most popular JOOLA rubber, due not only to its fantastic sound when speed glued but also because of its longevity, excellent spin and optimal feeling. For years players around the world have appreciated the combination of non-skidding upper rubber and the soft, super-elastic caoutchouc underlay. And for many players the SAMBA is still the ultimate because of its spin features.

Art. 70031

Strategy	DEF/OFF
Speed	fast
Spin	extra high
Control	high
Hardness	38°

SAMBA PLUS

Pimples in. 1.8, 2.0, max. mm.

Finally the big brother of the most played JOOLA rubber in recent decades is available. JOOLA classic now with incorporated speed glueing effect, that brings back the legendary Samba Sound into table tennis halls. The new SAMBA PLUS outshines all previous sound machines. Development and testing by a team of rubber developers, led by table tennis legend Jörg Roskopf, has been a lengthy process but the new SAMBA PLUS is now ready for the market. The result is an optimum composition of feeling, speed and rotation with phenomenal sound and effect. The SAMBA PLUS sets new standards in development of soft rubbers with incorporated speed glue effect.

Art. 70040

Strategy	DEF extreme/OFF
Speed	fast

SAMBA PLUS offers:

- Original pure speed glueing feeling
 - Long durability
 - Playing feeling in every situation
 - Super sound
 - Spin and rotation at the table and from half distance
- ... just a real JOOLA SAMBA!

Petrissa Solja
Germany

MAMBO

Pimples in. 1.8, 2.0, max. mm.

JOOLA MAMBO is manufactured in Japan using a revolutionary technology: The proportion of chemical packing material in the sponge and in the upper rubber are increased to the maximum permitted levels. This technique has a positive influence on the feeling of the ball and the sound without losing flexibility and speed. The result is a super-flexible and perfect rubber.

Art. 70201

Strategy	ALL/OFF extreme
Speed	fast
Spin	extra high
Control	high
Hardness	40°

MAMBO H

Pimples in. 1.8, 2.0 max. mm.

JOOLA MAMBO H is a high technology High Friction rubber. The sponge is slightly harder than that of conventional MAMBO. With a special glueing technique the upper rubber, which is already designed for extreme tension, is then combined with the sponge. This results in an unbelievable natural energy. This, in combination with the extreme grippy upper rubber surface, make it a rubber with a lot of spin.

Hungary

4 YOU

Pimples in. 1.5, 1.8, 2.0 mm.

The logical answer, to offer a low-priced rubber for the player with a low budget. Don't be fooled by the price, this is not a rubber for beginners, but an offensive allround rubber of the best Japanese quality – ideal for the controlled offensive player. The rubbers are ideal in combination with the blades ROSSKOPF ALLROUND or EAGLE MEDIUM. Amazing value for money.

Art. 70010

Strategy	DEF-/OFF-
Speed	medium
Spin	medium
Control	extra high
Hardness	40°

4 ALL

Pimples in. 1.5, 1.8 mm.

The 4 ALL offers slightly more control than the 4 YOU. The 4 ALL is a classic allround rubber, which is excellent for the developing player. The 4 ALL rubber provides excellent control and is still fast and dynamic, so that all basic strokes can be played without effort.

Art. 70001

Strategy	DEF-/ALL
Speed	low

NEW

The price alternative!

JOOLA®
for the *Champion* in you!

UPP

Pimples in. 1.6, 1.9, max. mm.

New well-priced JOOLA rubber that meets high demands. The medium hard, green sponge combined with the extremely grippy surface provides excellent "speed feeling" and also suits the player that needs full power far away from the table. JOOLA UPP is not for beginners but an alternative for players who request an adequate and top modern competition rubber at an attractive price!

TOPSPIN C

Pimples in. 1.2, 1.5, 1.8, 2.0 mm.

The TOPSPIN C uses the surface of our topspin rubber. The secret of this unique rubber lies in the composition of the sponge. This combination of highly grippy upper rubber with a special sponge results in a defensive rubber for perfectly safe defensive play, extreme variations in chop, and superb response to the opponent's topspin.

Art. 70260

Strategy	DEF/ALL
Speed	low
Spin	low
Control	extra high
Hardness	25°

AMY CLASSIC VERSION

Pimples in. Anti-Spin. 1.0 mm.

The AMY CLASSIC VERSION has very soft 1.0 mm sponge and is therefore slightly harder to control - however, the spin reversal when blocking is considerably more dangerous. In addition, this rubber also allows attacking and wobble shots.

Art. 71150

Strategy	DEF-/ALL
Speed	low
Spin	low
Control	extra high
Hardness	48°

AMY CONTROL VERSION

Pimples in. Anti-Spin. 0.4, 0.7 mm.

The AMY CONTROL VERSION has a novel, very thin sponge, providing good control. Even hard topspins can be returned without any problem. Amy Solja plays with the AMY CONTROL VERSION in 0.4 mm sponge.

Art. 71160

Strategy	DEF-/DEF extreme
Speed	low
Spin	low
Control	extra high
Hardness	40°

TONI HOLD ANTI TOPSPIN

Pimples in. Anti-Spin. 1.5, 2.5 mm.

The original anti spin rubber - unrivalled for total control. The best answer to topspin and strong spin.

Art. 71005

Strategy	DEF-/ALL
Speed	low
Spin	medium/high
Control	high
Hardness	40°

SHARK

Long pimples. 0X, 0.5, 1.0 mm.

JOOLA SHARK is a long pimples rubber with disturbing effect, which has an extremely high number of pimples. A good disturbing rubber, it has 3 components, the highest possible length of pimples, the highest possible number of pimples and the thin diameter of pimples. This has been achieved almost perfectly with SHARK.

Art. 71170

Strategy	DEF-/DEF extreme
Speed	low
Spin	medium
Control	extra high
Hardness	40°

ORCA

Long pimples. 0X, 0.5, 1.0 mm.

The ORCA can be controlled slightly easier than the SHARK. The number of long pimples is reduced and the pimples are thicker. Therefore blocks and attacking shots are easier to play. ORCA is particularly suitable for the aggressive disturbing game at the table.

Art. 71180

Strategy	DEF-/ALL
Speed	low/medium
Spin	medium
Control	extra high
Hardness	45°

BADMAN RELOADED

Long pimples. 0X, 1.3 mm.

For many players the BADMAN was the best and most dangerous “untreated” long pimple rubber. After the ban of the “treated” long pimple rubbers JOOLA has remade the BADMAN with the latest Tensor technology.

Our defensive experts Chen Weixing and Latin American Champion Liu Song think that the reloaded version of the BADMAN is once again the best defensive long pimple rubber presently available on the market. With BADMAN RELOADED it is possible to play extreme chop shots with dangerous wobble effect - relive the experience of treated long pimples!

Art. 71250

Strategy	DEF-/DEF extreme
Speed	low
Spin	medium
Control	extra high
Hardness	50°

OCTOPUS

Long pimples. 0X, 0.5, 1.1-1.2 mm.

Two of the world’s best defensive players, Chen Weixing and Latin American Champion Liu Song rely on the long pimples rubber OCTOPUS. With OCTOPUS you can play extreme chop shots and also add variation by taking the ball early at the table. An extra hard sponge provides extremely awkward effects.

Art. 71100

Strategy	DEF extreme/OFF extreme
Speed	extreme
Spin	medium
Control	high/extra high
Hardness	40°

EXPRESS ULTRA

Pimples out. 1.5, 2.0, max. mm.

Speed glueing became popular with short pimple users a long time ago. The time is now right to introduce EXPRESS ULTRA, the pimples out version with incorporated speed glue effect – the short pimple designed for professionals and ambitious offensive players.

Art. 70130

Strategy	DEF extreme/OFF
Speed	fast
Spin	medium
Control	extra high
Hardness	35°

TANGO ULTRA

Pimples out. 2.0, max. mm.

A short pimples rubber using the TENSOR effect and the result is not surprising: softer, more control and more spin but also with dramatic effects from the pimples. For passive blocking TENSOR absorbs the energy but for active blocking and attack the rubber really explodes.

Art. 71230

JOOLA has made the decision to cease using the old numerical system of rubber rating. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.

We will keep the traditional categories of playing features, but classification now has only 4 levels:

TABLE TENNIS RUBBERS DIFFER AS FOLLOWS:

Pimples in

THE „standard“ rubber. Combination of upper rubber (pimples pointing inward) and sponge, available in thicknesses of 1.0 – 2.3mm.

Short pimples/pimples out

Rubber with pimples upper rubber (pimples pointing outward). Short pimples are especially use for blocking and counter play.

Long pimples

Available without sponge (ox) or with different sponge thicknesses. Long pimples are for blocking/disturbing game at the table as well as chopping from half distance.

Anti-Spin

Combination from plain upper rubber and sponge. The plain surface facilitates returning of balls with a lot of rotation (service, spin).

THE TRADITIONAL PLAYING FEATURE CATEGORIES:

We will keep the traditional categories of playing features, but classification now has only 4 levels indicated by different colours:

Low Medium Fast Extreme

Speed

Defines speed of the ball when catapulted from the player's racket. The higher the speed of the blade the higher the ball bounce. For beginners we recommend rackets with with less speed.

Spin

Defines rotation produces by hitting the ball. The higher the grip of a rubber the more rotation can be given to the ball by touching.

Control

The control value is always proportional to the speed value. In practice rackets with high speed are harder to control than rackets with low speed. In order to sufficiently control with high speed a good deal of practice is necessary.

Hardness

In addition the rubbers are classified accordig to the hardness of the sponge (degree). The harder the rubber the more speed. The softer the rubber the more sensitive and controlled.

Speed

- low
- medium
- fast
- extreme

Spin/Control

- low
- medium
- high
- extra high

Rubber Technologies

Green Power

Performance achieved from fresh glueing is permanently incorporated into the rubber.

Tensor

Incorporated inner tension in the sponge and upper rubber. More elasticity, more spin, more speed and more feeling.

Geo-Force-Technology

Newly designed pimple arrangement with a more hollow space between the single pimples provides maximum spin and best possible control.

Geo-Sponge-Technology

Innovative macropore sponge design that increases the catapult effect therefore enabling higher ball trajectories.

Playing strategies

In order to choose the most suitable equipment every player should decide into which playing strategy they fall.

Classic, pure defensive play behind the table with occasional attacking shots.

Modern defensive play, also at the table, with positioned offensive shots.

Modern defensive play using special rubbers (e.g. Badman), aimed at disturbing the opponent's offensive play.

All techniques/stroke variations are played. Controlled shots, various rotation shots and positioned shots are more important than speed. One stroke side (mostly backhand) is focuses on blocking or counter play.

Various topspin techniques, often from half distance are paramount. Offensive play with precise attacking shots and variation of topspin. Often shots with later hitting of the ball and higher ball trajectory are played.

Dominant topspin strokes from both sides. Topspind is not only the preparing but also the point-making stroke.

Offensive players with uncompromising risk tolerance. Speed oriented stroke and power spin are paramount. Speed is prior to spin and variations.

K7 – Sensitive precision!

K7

approx. 90 g.,
5 + 2 Koto, Red Samba, Carbon NetT, Samba
The new Carbon-NetT-Material was used for the first time in the JOOLA K7. Carbon-NetT is lighter than other carbon fabrics and still provides the wanted stiffness that is responsible for the speed of the blade. The Enzo layers used at bonding provide high control, which can't be taken for granted on carbon blades. The RAG handle, exclusively developed by JOOLA, additionally increases this control.

Speed	extreme
Control	high

RAG-Technology

Unique **Round-About-Grip-Technology** – exclusively only in JOOLA blades. The handle completely incorporates the blade. Hundred percent precision is guaranteed through manufacturing with a CNC milling machine. By all around glueing of the grip plates with the blade vibrations are eliminated – therefore a more intensive ball response and increased control for the player.

Blade integrated into the handle

Carbon NetT

Very light-weight special Carbon, enlarges the swee spot and enables a softer touch at ball resonance.

Samba

Used as middle veneer guaranteeing best possible stability.

Red Samba

Another layer for stability improvement, incorporates the Carbon material perfectly into the blade.

Koto

High quality and expensive outer veneer für precise ball bounce.

Round-About-Grip

K6

approx. 90 g., 5+2 Samba, Limba, blue Texalium, Samba

The K6 with the Round About Grip technology is a blade of the highest quality. The K6 is an offensive blade without compromise – the middle layer made of Blue-Texalium guarantees excellent stiffness which means that it is almost distortion-free and the size of the sweet spot remains consistent. Speed and control of the K6 offer perfect playing balance and the RAG grip guarantees excellent ball feedback.

JOOLA K6 – a modern and extremely ambitious high-tec blade that guarantees all requirements of a competition blade, especially for top players.

Art. 66543	penholder

Speed	fast
Control	medium/high

K5

approx. 85 g., 5 Samba, Limba

The JOOLA K5 does not only fall into the category of first class high tech blades due to its exclusive design! In practice vibration control is achieved through the RAG technology and the JOOLA "honeycomb", which is almost legendary amongst experts. With these features the K5 has become an established bestseller.

WING

The JOOLA blade innovation with
Wing-Shaft-Integration Technology

WING CARBON

approx. 85-90 g., 3+2 Fineline, CS-Carbon, Kiri
JOOLA Wing Carbon - an uncompromising offensive blade that is already used by many JOOLA players. The medium hard CS (crystal structure) carbon gives the blade an extreme stiffness and because of its fabric structure also enables the development of extremely spinny balls. The Wing handle technology guarantees excellent ball response: the comfortable handle is just remarkably good !

WING MEDIUM

approx. 80 g., 5 Koto, Ayous, Kiri
WSI technology (Wing Shaft Integration) provides a totally new feel. The handle is integrated into the blade like a wing thus providing excellent stability. The layers of precious Hinoki are aerodynamically shaped into the handle so that the grip fits perfectly in the hand.
The combination of veneers provides well-balanced playing features and is ideal for players with a lot of spin and a precise blocking game.

After the huge success of the EAGLE-series, JOOLA presents once again an optically good-looking blade series with a great value for money. The design of the three new JOOLA FALCON blades impresses with a classic, elegant and clear structured line. All blades are made from high quality veneers and are manufactured to the highest quality standards.

FALCON medium

approx. 80 g., 5-fach, Ayous, Ayous, Tungwood
Pure control - that is what the 4 Ayous-layers in the FALCON medium stand for. The mid-veneer which consists of „Tung-Wood“ provides the necessary stiffness for hard topspin balls.

FLAME EXTREME

approx. 90 g., 5 ply Limba 0.8mm, Ayous 1.0mm, Kiri 4.8mm

Pure speed is not the sole motto of the FLAME EXTREME.

The intelligent combination of 5 layers with the 0.8mm Limba inner veneer and the new type of BURNtec outer veneers makes it possible not only for professional players to control this blade.

The unbeatable price-level will allow everybody to try an "extreme" blade.

FLAME FAST

approx. 85-90 g., 5 ply Hinoki 0.8mm, Ayous 1.0mm, Kiri 3.2mm

The FLAME FAST proves the fact that high speed and good control don't have to be a contradiction.

The precious 0.8mm Hinoki upper layer, in combination with the BURNtec finishing, guarantees an extra class blade for all offensive players. The hard Kiri core veneer provides the necessary torsion rigidity in order to generate maximum power for aggressive top spin shots. A high class blade for all players, that take advantage of top spin play.

Chen Weixing
Austria

CHEN DEFENDER

approx. 90 g., 7 Samba yellow, Samba, Enzo, Samba

For some time, the Chen Weixing Defensive blade has been one of the most popular defensive blades. Working with the world class defensive player from Austria, we have now developed another blade designed for extremely defensive players.

The CHEN DEFENDER is an oversize blade with considerably more control. The ENZO glue layer between two Samba veneers provides greater control and tremendous feel of the ball.

Art. 64335 straight

Speed	low
Control	extra high

CHEN WEIXING

approx. 90 g., 5 + 2 Limba, Koto, Black-Cloth, Kiri

Designed by Europe's best defensive player, it is best suited to a variable and controlled chop defensive game. But also fast topspin shots, as played by Chen Weixing, are possible without any problem.

The layers of black-cloth layers in the construction provide increased control.

Art. 64330 flared
Art. 64325 straight

Speed	medium
Control	extra high

TONI HOLD WHITE SPOT

approx. 85 g., 5 Pappel

The defensive classic blade!

Specially suitable for anti-top rubbers. The cottonwood veneers are extremely soft and very slow providing great control.

Art. 64300 straight

Speed	low
Control	extra high

ROSSKOPF JUNIOR

approx. 80 g., 5 + 2 Limba, Abachi, Black-Paper

The ROSSKOPF JUNIOR is the exact reproduction of the ROSSKOPF ALLROUND. The blade is specially designed for children with a smaller and thinner handle. In order to keep the balance of the blade the surface is slightly smaller. The result is the ROSSKOPF JUNIOR, the ideal blade for children.

Art. 67115 flared

Speed	medium
Control	medium/high

CHEN JUNIOR

approx. 70 g., 5 Koto, Mahogany Tungwood

Chen Weixing has applied the knowledge gained from training with young Chinese players. It is well-balanced for a child's hand. Ideal relation of speed and control for learning basic strokes.

Art. 64340 flared

Playing strategies

DEF-

Classic defensive orientated game away from the table with an occasional attacking shot.

DEF

Modern defensive game, also close to the table, with placed attacking balls.

DEF extreme

Modern „material“ game with special rubbers (e.g. Badman), with the aim to disrupt the opponent's attacking game.

ALL

All techniques/shots are played. Controlled shots, variation of spins and placement are more important than speed. One side, usually the backhand side, is focused on blocking or counter shots.

OFF-

Variable topspin techniques, often away from the table, are in focus. The balls are mostly played with a later contact point and have a higher ball flight.

OFF

Game-determining topspin shots from both sides dominate the game. The topspin is not only the set-up, but also the point-winning shot.

OFF extreme

Offensive player who plays with a lot of risk. Speed-orientated and power-topspins stand out from other shots. Speed is more important than spin and variation.

As with the rubbers, JOOLA has made the decision to cease using the old numerical system of rubber rating. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.

The blade design will incorporate the following characteristics which also make JOOLA blades very distinctive:

Colour coding of speed

In our view, the decisive factor for classification of a blade is speed. Therefore we will base all playing categories on the speed of the blade. The speed features are classified into different colours.

The colour of the speed features is also repeated in the design of the handle lense.

Classification on the blade face

For instant recognition, the characteristics are clearly displayed on the blade face. Again the colour of the print identifies the speed and the level of control is also displayed.

Handles

Blade Technologies

RAG
Round-About-Grip is a handle developed by JOOLA which integrates the complete blade into the handle.

Flow glue
Glue used in aeroplane construction provides an extremely hard, almost vibration free blade.

Junior blade
Blades especially designed for a child's hand, with smaller blade and shorter handle.

CARBON
The classic among the used fibres. Increased the sweet spot, reduced vibration.

CARBON CS
Extra catapult effect for speed and spin.

meliorate CARBON
Very hard and expensive carbon material. Large sweet spot, unrivalled control.

WSI (Wing-Shaft-Integration Technology)
The JOOLA blade innovation with Wing-Shaft-Integration Technology. Wing-shaped handle reinforcement.

BURNtec
Almost warp-free blade with moisture removed.

Balsa
Soft power with extra feeling at lowest weight!

Texalium
Aluminium coated fiberglass fabric, large sweet spot, good acceleration.

EDGE BAND

0,50 m:
10/12 mm black, 10/12 mm red

5,00 m:
10/12 mm black, 10/12 mm red

50,00 m:
10/12 mm black, 10/12 mm red

SPONGES AND CLIPS

Bag with 50 sponges and 2 clips.

Art. 82039

TURBO CLEANER

Anti-static rubber cleaner.
Regular use extends the durability
and the firm grip of the rubber.

Art. 84015 200 ml

TABLE CLEANER

Cleaning fluid for table tennis tables.
Removes dust, dirt and sweat stains.

Art. 84010 500 ml

SET RUBBER CARE

Clipper foam: Cleaning foam for table tennis
rubbers. Cleans, protects and makes the rubber
grippy.

Cleaning sponge: Cleaning sponge made from
chamois leather for gentle cleaning of sensitive
table tennis rubbers.

Care set: Includes clipper foam and cleaning spon-
ge. In practical transparent packing, excellently
suited as storage box.

Art. 84045 foam
Art. 84020 cleaner 150 ml
Art. 84050 set

X-GLUE

VC free glue which provides excellent glueing of blade and rubber after
a short drying time. The rubber can be easily removed from the blade.

Art. 82050 37 ml
Art. 82051 90 ml
Art. 82052 1000 ml

LEX

Solvent free glue with latex base.

JOOLA LEX combines the ideal requirements of a table tennis glue - short drying
time, excellent glueing and easy removal - with the new technical expertise of
the "non-glueing era". Outstanding price/performance ratio.

Art. 82035 20 ml
Art. 82036 100 ml
Art. 82037 1000 ml

SUPER 40 ***

SUPER 40

The classic among competition balls. The quality has been proved a million times. Durability and extreme resilience have made this ball one of the most played ITTF balls. Plus the excellent ration of price and performance makes it the ideal club ball.

TOUCH

The classic among table tennis shoes has been upgraded with a new appealing "outfit". The sole, manufactured in the same way for many years, stands for excellent non-skipping features. The upper material has now been revised and especially the seams and design have been improved. Therefore, TOUCH is still the model for all leisure table tennis players.

Size: 36 - 46

Art. 98141

B-SWIFT

An absolute highlight among table tennis shoes. The modern and yet functional design is specifically tailored to the demands of top performance table tennis.

The newly designed sole with incorporated, extremely soft speed absorbing components, perfectly transform even the fastest changes in movement and therefore help to implement the sensed playing situation to footwork.

The JOOLA top players Chen Weixing and Daniel Habesohn (European Champions doubles 2012) have used this shoe during the last months in competitions and are very satisfied.

Size: 36 - 45

Art. 98127

X-SPEED

Once again JOOLA presents a top modern table tennis shoe that will not only cause a sensation because of the striking trend colours orange and blue, but also will more than convince regarding quality and playing features. In addition the sole with good dampening features, which has been proven for many years in JOOLA shoes, provides superb wearing comfort. Size: 36 - 46

Art. 98163 orange

Art. 98152 blue

NEW

AIROW

JOOLA AIROW is a reasonably priced and lightweight table tennis shoe with a very soft sole guaranteeing excellent skid resistance. In the Asian region this shoe has already been used by players of all playing classes with highest satisfaction

Size: 36 - 46

Art. 98257

X-STEP

The modern, stylish, JOOLA shoe X-STEP in 3 colour combinations. Players don't just want to play table tennis, they also want to look good. X-STEP shoes are the perfect choice. Stable, comfortable, functional, anti slip and trendsetting - all in one!

Size: 36 - 46

Art. 98052 blue
Art. 98074 green

PRO JUNIOR

For the first time JOOLA presents a table tennis shoe specially developed for children. The PRO JUNIOR has the same excellent non-slip sole which has proven to be so successful over many years. The EVA inner sole protects the growing joints of children from extreme strains. The extra lightweight shoe permits fast and sudden changes of direction and supports the natural movements in table tennis.

Size: 30 - 36

Art. 98010

Socks STANDARD

TT socks in packs of three in different colours.

80% cotton / 20% Man Made Fiber

RALLYE

The new top shoe from JOOLA for players of the highest standard. The uppers are made from breathable mesh and functional micro fibre which guarantees excellent breathability and comfort. In the sole the proven phylon material is used, making it very light and slip-resistant. The legendary EVA inner sole in combination with the new supination support prevents the foot from deviating outwards. The RALLYE has been developed for the ambitious player demanding an extremely lightweight, non-slip and flexible table tennis shoe that also reduces heavy strain on the joints.
