**OUR INNOVATIONS
LIGHT THE WAY
AROUND THE GLOBE**

2012 ILLUMINATION TOOLS *FULL-LINE CATALOG*

INNOVATION...

IT'S OUR HISTORY. IT'S OUR FUTURE.

In the rapidly changing portable light industry, Streamlight's key to success remains our obsessive focus on the voice of its customers. We continually strive to surpass expectations for our products by listening to our end users and adapting the latest technology to uniquely improve functionality and performance. Our substantial investment in design and engineering has resulted in industry-leading product line breadth with many of our products enjoying best of category status. Our employees are users too. Hunters, firefighters, former police and military, their field experiences drive innovation. We back these efforts with a world class manufacturing facility in Eagleville, Pennsylvania and after-sale service that keeps your Streamlight running for a lifetime. And while work this satisfying can be fun, we always keep in mind the serious nature of our customers' intent - that the light will always be at the ready and assist in doing the job faster, more effectively and with greater safety.

It's not enough that our lights perform better than expected. They also need to be a good deal at the cash register. Our ingenuity extends to the ultimate price point, where our mission is to deliver the best possible value to the end user for a premium quality product. The Streamlight experience is further enhanced through the relationships we have built over time with our extensive distribution partners. Their point of sale and service knowledge of these professional lighting tools makes an important difference.

It all adds up to a healthy respect for the people that rely on our lighting tools to make them the best at what they do. We believe these customers should have the best product that we can create and a complete buying experience that's second to none. Thank you to the three generations of customers that have made Streamlight their product of choice. We look forward to serving you in the future.

*Ray Sharrah
President and Chief Executive Officer*

HEROES TRUST STREAMLIGHT®

THE LOYALTY AND TRUST THAT PUBLIC SAFETY AND THE MILITARY HAVE GIVEN STREAMLIGHT IS BASED ON YEARS OF TESTING IN THE FIELD, AND THE PROVEN PERFORMANCE EARNED BY CARRYING OUR LIGHTS IN DANGEROUS SITUATIONS. UNCOMPROMISING PRODUCT QUALITY. OUR STRIVING FOR EXCELLENCE AND ACCOUNTABILITY HAVE DRIVEN CONTINUOUS PRODUCT IMPROVEMENT AND NEW PRODUCT INNOVATION. THAT TRUST HAS LED TO GROWTH ACROSS MARKETS AND IS WHY A STREAMLIGHT IS ONE OF THE MOST RECOGNIZED PROFESSIONAL FLASHLIGHTS AND LANTERNS.

TOOLS NOT TOYS®

STREAMLIGHT MAKES TOOLS NOT TOYS, BUT YOU DON'T NEED TO BE RUSHING INTO A BURNING BUILDING, CHASING A SUSPECT OR LEADING A MOUNTAIN SEARCH PARTY TO BENEFIT FROM OUR TECHNOLOGIES. WE MAKE TOOLS FOR EVERYONE WHO NEEDS TO LIGHT THE DARKNESS, FROM OUTDOOR ENTHUSIASTS TO AUTO MECHANICS, TO INDUSTRIAL CONTRACTORS TO MILITARY PERSONNEL AND HOMEOWNERS. WE'RE ALWAYS COMING UP WITH WAYS TO MAKE LIGHTS BRIGHTER, LIGHTER, MORE COMPACT AND LONGER LASTING.

STREAMLIGHT: 39 YEARS OF INNOVATION

STREAMLIGHT: THROUGH THE YEARS

1973 Streamlight founded by engineers who created solar simulators for NASA.

1989 Streamlight introduces the Survivor® line, still the world's #1 right-angle rechargeable flashlight.

2003 ISO 9001:2000 ISO certification awarded to Streamlight July 28, 2003 and ATEX Ratings: Certified to Annex IV Directive 94/9/EC August 29, 2003

MID 1980s Variety of miniature flashlights introduced.

1998-1999 Vulcan®, Stylus® and ProPolymer® series debut.

1975 Rechargeable halogen lamp flashlight introduced by Streamlight.

1993 Streamlight unleashes the iconic Stinger®, the industry's first, category-defining, compact rechargeable flashlight.

2001 Streamlight leads the market with innovative LED lighting products.

1980 LiteBox® Lantern invented by Streamlight.

2000 Streamlight builds state-of-the-art manufacturing facility/corporate headquarters in Eagleville, PA.

With the development of the first million candle power hand-held light for NASA, Streamlight set a new standard for the lighting industry. Then we did it again with the introduction of the rechargeable Stinger®. Its combination of size, performance, and durability made it the first choice of law enforcement professionals the world over. And we've been raising the bar ever since. Streamlight holds over 121 US and foreign patents, and over 53 US and foreign trademarks. We're pioneers in rechargeable flashlights. We're revolutionizing LED lights. We've made lights brighter, more compact and incredibly durable. We've extended the run times. And we're still coming up with dramatic new ways to make our customers' jobs easier and safer.

- 1st million candela peak beam intensity portable Xenon arc light – SL-1 Million
- 1st halogen rechargeable flashlight – SL-20®
- 1st halogen rechargeable lantern – LiteBox®
- 1st single-cell “AAA” miniature light – Key-Mate®
- 1st convertible headlight/flashlight – TopSpot®
- 1st compact, high-performance rechargeable – Stinger®
- 1st LED/xenon combination – Cyclone®
- 1st illuminated handcuff key – CuffMate®
- 1st LED penlight – Stylus®
- 1st co-molded rubber/plastic flashlights – ProPolymers®
- 1st dual-switch LED Stinger® – Stinger DS® LED

2003 Streamlight puts LED and xenon lights together in patented Twin-Task® series. New Tactical line premieres featuring Super High Flux LEDs. Fire Vulcan® aids firefighter safety as the first lantern with LED tail lights.

2008 C4® LED technology introduced. Streamlight expands headquarters and manufacturing facilities with 75,000 square foot addition.

2010 The versatile work light rechargeable Knucklehead® debuts, which features a hangable LED flood light with a 360° rotating head. The Polystinger® LED Haz-Lo®, our first intrinsically safe, Class I, Div. I rechargeable Stinger® is also introduced. Streamlight continues its support of our nation's troops with an expanded line of IR/white light illumination tools with the TLR-VIR.®

2006 Streamlight introduces our first aluminum gun-mounted lights, TLR-1® and TLR-2® LED versions of the Stinger® and Survivor® are created.

2004 Streamlight introduces Strion®, the world's first ultra-compact rechargeable. At just 4.6 oz., it shines as bright as lights 5x its size.

2009 Streamlight is instrumental in creating ANSI/NEMA FL 1 standard, a uniform way to measure and compare flashlight performance. Strion® LED is introduced, our first lithium ion rechargeable LED and gun – mountable tactical light. The PolyStinger® LED becomes our first rechargeable LED with a virtually indestructible nylon polymer body. The super-small Sidewinder Compact® debuts, weighing just 2.4 oz.

2011 The pistol-grip Waypoint® is introduced, becoming our brightest non-rechargeable hand-held light. The “X” series indicates a new, high-performance model for several popular lights, with an extremely powerful high mode, a low mode, and a strobe.

2007 Dual-switch Stinger DS® debuts. Streamlight creates a true million candela peak beam intensity lantern – the HID LiteBox® with a beam that reaches 1.5 miles. The Sidewinder® debuts as the most versatile military light, with multiple function LEDs and multiple brightness levels for each.

COMMUNITY **STREAMLIGHT**CARES.

// WE'RE COMMITTED TO OUR CUSTOMERS

OUR CUSTOMERS HELP US MAKE BETTER LIGHTS. You tell us what you like about our lights. You also tell us about features you'd like to see. Most important, you're very clear about what you don't like. We listen. And we respond. Many of your comments have led to major product improvements and innovative new products. Pleasing you is what Streamlight is all about. We couldn't do it without your input. So keep talking. And we'll keep listening.

// YOUR SAFETY IS OUR TOP PRIORITY.

Since the most extreme hazardous conditions are often in dark places, Streamlight created a complete line of safety-rated lights. We've developed powerful lighting tools that are safe to use even around explosive gases and other potentially explosive atmospheres. If you're working in Europe, we have a number of lights that are safety-rated per European standards.

We're also concerned with the safety of outdoor enthusiasts. So we've equipped many of our flashlights, headlamps and penlights with a green LED light that's so strong, it's visible from over a mile away.

And we're helping to keep police officers, firefighters and military personnel safer with lights that combine multiple safety features and functions that help them perform their tasks more efficiently.

// WHEN IT COMES TO CUSTOMER SERVICE, WE REALLY SHINE.

To make sure that our customers get the best and fastest service, Streamlight has service centers throughout the world. They're staffed with highly-trained employees who understand our products, and have the power to help with any problems. When you call our customer service line, you're connected with a

Streamlight employee, right here at our headquarters. You'll talk to someone who understands the challenges you face, knows how to help you find the best lights for your particular needs, and how to help you get the most from your purchase.

// WE BACK OUR PRODUCTS BETTER BECAUSE WE BUILD THEM BETTER.

We build our lights to be strong and tough; and to last... through just about anything. That's why they're backed by one of the strongest warranties in any industry. Streamlight's "Limited Lifetime Warranty"* states that we will repair, replace or refund the purchase price, at our option, of any Streamlight product that does not work as a result of a manufacturing defect for as long as you own it. Of course, this excludes batteries, bulbs, chargers, switches, electronics, normal wear and tear, and damage caused by abuse. Rechargeable batteries, chargers, switches and electronics have a 2-year warranty.

In the unlikely event that you have a problem with a Streamlight product, go to www.streamlight.com for the location of an authorized service center near you. Your particular Streamlight product may have a different warranty that was in place at the time of purchase. Please provide proof-of-purchase when processing a warranty claim.

* Sidewinder®, Sidewinder Compact® and Sidewinder Compact® II not included.

// STREAMLIGHTGEAR.COM

The official online source for all Streamlight-branded merchandise. Through this exclusive website, anyone can purchase a variety of Streamlight-branded gear and accessories. We've got Streamlight apparel, hats, and lots of cool stuff. Check it out.

// WHAT'S IMPORTANT TO YOU IS IMPORTANT TO STREAMLIGHT

We're Committed To The Causes That Matter To Our Customers.

The law enforcement officers, firefighters, first responders and military personnel who depend on Streamlight products don't consider themselves heroes. But we do. "I'm just doing my job" they say. That's true. But their jobs often demand exceptional bravery, endurance and skill.

One way we try to thank them for their service is by making lights that help keep them safer. But that's just not enough. So we also support the causes that are important to them. It's the least we can do.

Following are some of the programs that Streamlight is proud to support:

- Concerns of Police Survivors (C.O.P.S.) – provides support for families and co-workers of officers killed in the line of duty.
- National Fallen Firefighters Foundation® – celebrates the lives of firefighters who died in the line of duty, and assists their families and co-workers.
- Buckmasters American Deer Foundation (BADF) gives back to the community by supporting charitable projects such as hunts for the disabled, Life Hunts for children with critical illnesses and Project Venison.
- Breast Cancer Research Foundation® – provides critical funding for breast cancer research at leading medical centers worldwide
- National Tactical Officers Association® – a training resource dedicated to improving public safety by enhancing officers' tactical skills.
- The Travis Manion Foundation® honors and assists our nation's veterans, first responders, and the families of fallen heroes through various grants, scholarships, races, and *the annual 9/11 Heroes Run*. Named for a brave young marine who was killed by sniper fire in Iraq, the Foundation's mission is to continue the service to community and country as exemplified by the nation's fallen heroes, and to help create a generation of future leaders.

TECHNOLOGY **STREAMLIGHT** LEADS.

// LIGHTING TECHNOLOGY IS RAPIDLY CHANGING

...and flashlights are becoming more sophisticated tools.

Innovation has been what Streamlight is all about from the very beginning – since the engineers who founded the company successfully responded to NASA's challenge to create a light that simulates sunlight. Among our latest innovations is a system that elevates the performance of LED (Light Emitting Diode) lights. Thanks to Streamlight's C4® LED technology, you can now have a personal light with:

- No bulb that will break or burn out
- Exceptionally long run time between changing or recharging batteries
- Intense brightness
- A powerful, long-reaching beam
- Ample sidelight to illuminate an entire scene

// C4® LED TECHNOLOGY: THE STREAMLIGHT FORMULA FOR LED PERFORMANCE.

It all begins with the careful selection of the "best of the best" power LEDs. Like snowflakes, no two LEDs are precisely alike. That's why Streamlight sources its power LEDs from suppliers that incorporate the latest technologies in the manufacturing process, yielding the highest LED power chips with remarkable lumen per watt ratios.

An innovative Streamlight-engineered reflector further enhances the "throw" of the LED light, creating an intensely strong, tightly-focused beam, even at long distances, while generating optimized "spill" light to create a wider arc of illumination.

But Streamlight doesn't stop there. We carefully design and engineer each internal flashlight component – including the switch mechanism, lens type and battery source, whether lithium, alkaline, nickel cadmium (NiCd) or nickel metal hydride (NiMH) – to drive the LED's performance in a way that is most effective for each flashlight's intended use.

We search the world for the absolute best components, then we put it all together under the strictest quality control conditions to deliver the latest, most advanced "power" LED flashlight.
